December 6, 2013
File No. 01213340.00

This Limited Phase I Environmental Assessment Report for the Malibu Civic Center Wastewater Treatment Facility Project located in Malibu, California, dated December 6, 2013, was prepared by Ashley Hutchens and reviewed by Julio Nuno.

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. The resumes for the individuals below are included in **Appendix F**. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

SCS Engineers (SCS) was retained by RMC Water and Environment to prepare a Limited Phase I Environmental Assessment of Malibu Civic Center Wastewater Treatment Project located in Malibu, California (the “Property”). This assessment was performed in conformance with 40 CFR 312, Standards for Conducting All Appropriate Inquiries, and in general conformance with ASTM E1527-05.

Based on the scope of work performed, SCS finds the following:

- The Property is located in Malibu, California within an area spanning approximately 1.15 by 2.13 miles. Generally, the Property is bounded by Malibu Canyon Road to the west, foothills of Santa Monica Mountains to the north, Sweetwater Canyon Drive to the east, and the Pacific Ocean to the south. The Property consists of a proposed project area consisting of a Wastewater Treatment Facility (WTF), two injection well areas (IW1 and IW2), six pump stations (PS), and numerous piping runs (identified on Figure 2 of **Appendix A**). The WTF consists of Assessor Parcel Numbers (APNs) 4458-028-020 and -006 (94,210 square feet of land).
- The WTF area is currently occupied by an existing wastewater treatment plant for the Malibu Colony Plaza shopping center. The treatment includes a physical process (to separate solids from liquids), a biological process (aeration and recirculation), and a chemical process (addition of chemicals [sodium hypochlorite and sodium bisulfate] for treatment) prior to testing of effluent and discharge to seepage pits. These processes include use of several large clarifiers, four above ground storage tanks (ASTs) for wastewater circulation, two ASTs for chemical storage (sodium hypochlorite and sodium bisulfate), an approximately 50,000 gallon underground storage tank that holds the treated effluent prior to discharge, and an injection field comprised of approximately 12 injection zones, each consisting of up to 8 injection wells/seepage pits (only five of which are currently being used). Five groundwater monitoring wells are located around the perimeter of the WTF Property and are monitored quarterly to comply with the current Waste Discharge Permit (WDR) permit.

The WTF area appeared to be vacant or agricultural land as early as 1928. Although it is not possible to determine when this area began to be used for wastewater treatment, aerial photos depict the land as a vacant area with a dirt road as early as 1947, suggesting it could have been used as such at that time. Permits first indicate the presence of septic tanks and seepage pits (leach field) by 1988.

- IW1 is located in Malibu Road just south of the Malibu Colony Plaza shopping center. IW1 spans a distance of approximately 1,400 feet along Malibu Road west of its intersection with Webb Way. IW1 is bounded to the south by numerous residences, a fire station (a 1,000-gallon diesel AST was observed at the southwest corner of the fire department site), and a commercial strip center at the eastern end. Drycleaner facilities, which are often associated with releases of solvents that affect soil and groundwater over large distances, were observed adjacent to the southeast of the eastern boundary of IW1 (Spic & Span cleaners) and to the north of IW1 (Ogden Cleaners). Five groundwater monitoring wells were observed on the southern boundary of the Malibu Colony Plaza

shopping center near the Ogden Cleaners facility and in Malibu Road within the IW1 area. Data from those wells were not available to SCS for review.

The area encompassed by IW1 in Malibu Road was formerly a portion of Pacific Coast Highway (previously known as Roosevelt Highway). A gas station was present at 23757 Malibu Road from at least 1938 to 1957, north of IW1 (and the proposed pipeline running through Malibu Road). The current shopping center to the north of IW1 was constructed between 1987 and 1989. Ogden Cleaners has been a tenant in this Center from at least 1990 to the present.

The southwest corner of IW2 is occupied by a medical building (23661 Pacific Coast Highway) that includes an urgent care facility and a pharmacy. The remaining portion of IW2 is occupied by Legacy Park, which has a walking path and serves as part of a stormwater treatment system which eventually discharges to Malibu Creek. Three monitoring wells and a clarifier (anticipated to be associated with septic system) were observed on the north side of the parking area associated with the building.

IW2 appeared to be vacant until the current structure at 23661 Pacific Coast Highway was constructed around 1975 for use as a bank. Additional gas stations were present in the area of IW2 at 23641 Pacific Coast Highway (east of IW2) from at least 1966 to 1985, at 23614 Pacific Coast Highway (southeast of IW2) from at least 1956 to 2010, and at 23670 Pacific Coast Highway (south of IW2) from 1975 to the present. Legacy Park was constructed in 2010.

- The proposed pump station areas P1, P3, P5, and P6 are expected to be located within the roadways or near shoulders associated with the roads. PS2 will be located at the northwest corner of the parking lot associated with the Malibu Bluffs Park and PS4 will be located in or on the edge of Legacy Park. The areas of PS3 and PS5 could not be observed visually due to the inaccessibility of the gated Malibu Colony community.

With the exception of PS2, the pump station areas are within existing roadways that have been present since at least 1928. PS2 was in an undeveloped or agricultural area until Pacific Coast Highway was rerouted to the north of it in 1947. By 1960, grading in the area of PS2 was observed for construction of the park road nearby. By 1989, additional grading was observed resulting in its current configuration. The areas surrounding PS1, PS3, and PS5 have been residential since first development in those areas as early as 1928.

- Pipeline areas were observed by driving the roadways where they are proposed. Other than various utilities in the roads and adjacent to them, five groundwater wells in Malibu Road were the only observation to note as part of the pipeline alignment inspection.

Malibu Road appears to have been the former alignment for a portion of Pacific Coast Highway (previously known as Roosevelt Highway) until Pacific Coast Highway was rerouted to the north in approximately 1947. A gas station was present at 23757 Malibu Road from at least 1938 to 1957, just north of the pipeline alignment running through Malibu Road and IW1. The current shopping center to the north of IW1 was constructed between 1987 and 1989, and Ogden Cleaners has been a tenant from at least 1990 to the present. Gas stations were also present at 23670 Pacific Coast Highway (east of the Webb

Way pipeline) from at least 1975 to present and at 23387 Pacific Coast Highway (at the intersection with Cross Creek Road) from at least 1968 to present. Additional drycleaner facilities were observed or identified at 23410 Civic Center Way (Landmark Cleaners adjacent to Civic Center and Cross Creek pipelines) from at least 1985 to 1999 and Spic & Span Cleaners currently located at 23680 Malibu Road (southeast of Malibu Road and Webb way pipeline intersection) and was formerly located at 22941 Pacific Coast Highway (north of the pipeline alignment) from at least 1975 through 2010.

- Available records from Los Angeles Department of Public Works (LADPW) indicated that a 550-gallon diesel underground storage tank (UST) had been located on the eastern side of 23720 W. Malibu Road (LA County fire station #88 located south of IW1 and the pipeline in Malibu Road) from 1954 to 1996. Sampling during UST removal showed the presence of low levels (maximum of 33 milligrams per kilogram) of oil range hydrocarbons. This UST is considered an historical recognized environmental condition and the former UST and the current AST at this location are not anticipated to impact the Property.
- Numerous sites/facilities have been identified on the database report associated with waste discharge requirements associated with septic systems. Many of the sites have received Notices of Violations for late reports, missing data, effluent violations, unauthorized flow increases, etc. We do not anticipate that these notices of violation would affect the Property.
- The database report identified numerous known or suspected release cases. These facilities and others identified during historical research and the site inspection (many of which were discussed previously) are recognized environmental conditions based on their proximity to the proposed project and are as follows:
 - HRL Laboratories, 3011 S. Malibu Canyon Rd.
 - GTE (Verizon) Malibu Plant Yard, 3705 Cross Creek Rd.
 - Cross Creek Yard/Adamson Companies Maintenance/1X Mallen Excavating, 3728 Cross Creek Rd.
 - LA Co DPW Road 336/#436TS, 3637 S Winter Canyon Rd.
 - Santa Monica Malibu USD-Webster Elementary, 3602 Winter Canyon Rd.
 - Malibu Shell/Texaco, 23387 Pacific Coast Highway
 - Malibu Sheriff's Station/LA Co DPW, 23555 Civic Center Way
 - Chevron, 23614 Pacific Coast Highway
 - Unocal #6267, 23670 Pacific Coast Highway
 - Chevron Station 97213, 23641 Pacific Coast Highway
 - Spic & Span, 22941 Pacific Coast Highway
 - Spic & Span, 23680 Malibu Rd.
 - Landmark Cleaners, 23410 Civic Center Way
 - Colony Cleaners, 3872 Cross Creek Rd.
 - Ogden Cleaners, 23823 Malibu Rd.
 - Historical gas station, 23757 Malibu Rd.

Conclusions

In summary, SCS has performed a Phase I Environmental Site Assessment of Malibu Civic Center Wastewater Treatment Project located in Malibu, California, in conformance with the scope of 40 CFR 312, in general conformance with ASTM E1527-05, and within the limitations identified within this report. In the opinion of the Environmental Professional, this assessment has revealed evidence of conditions indicative of releases or threatened releases of hazardous substances, as discussed above.

Based on SCS's understanding of the User's intent to install a centralized wastewater collection and treatment facility to include a wastewater treatment facility, injection well areas, pump stations, and pipelines, the facilities known to have releases or have the potential to have releases are identified as recognized environmental conditions (i.e. leaking USTs, solvent use, drycleaners). It is our opinion that hazardous materials could be encountered during project implementation at certain areas on the Property, particularly at the locations identified on Figure 5 in **Appendix A**.

Data Gaps

The following data gaps were identified:

- SCS was unable to obtain access to the gated Malibu Colony community for inspection of Malibu Colony Road and pump stations 3 and 5.

Based on observations of the other pump station and pipeline areas and the fact that Malibu Colony Road is a residential area and appears to historically been used for residential purposes only, this is not considered a significant data gap.

1 INTRODUCTION

SCS Engineers (SCS) was retained by RMC Water and Environment (RMC; the “User”) to prepare a Limited Phase I Environmental Assessment of the Malibu Civic Center Wastewater Treatment Facility (CCWTF) Project located in Malibu, California (the “Property”). A location map for the Property is presented as Figure 1 in **Appendix A**. Due to the size of the project area, a complete Phase I Assessment could not be conducted for the entire Property as defined below. Where applicable and as defined below in the objectives, this assessment was performed in conformance with 40 CFR 312, Standards for Conducting All Appropriate Inquiries, and in general conformance with ASTM E1527-05.

2 PURPOSE

The purpose of this assessment was to identify locations within the project area/Property where conditions indicative of releases or threatened releases of hazardous substances as defined in CERCLA Section 101, and petroleum products, are present that could be encountered during future construction or could affect future use of the Property.

This assessment is not intended to constitute appropriate inquiry into the previous ownership and uses of the Property, as required to support the assertion of the innocent landowner, contiguous property owner, and/or bona fide prospective purchaser defenses to liability (collectively the landowner liability protections, or LLPs) under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA a.k.a. Superfund), as amended by the Superfund Amendments and Reauthorization Act of 1986 (SARA) and the Small Business Liability Relief and Brownfields Revitalization Act of 2002.

3 SCOPE OF SERVICES

This Phase I Environmental Assessment is based on:

- Interviews with past and/or present owners, operators, and/or occupants of the Property (Limited to Wastewater Treatment Facility).
- Reviews of federal, tribal, state, and local government records.
- Visual inspections of Publically Accessible areas of the Property performed on November 21, 2013.
- Review of historical Property use information (topographic maps, aerial photographs, fire insurance maps, existing reports, etc.).
- Commonly known or reasonably ascertainable information about the Property (e.g., interviews with appropriate regulatory agency personnel and review of agency files review of available documents, interviews with other knowledgeable persons).
- Degree of obviousness of the presence or likely presence of contamination at the Property, and the ability to detect the contamination by appropriate investigation.
- Information provided as a result of the additional inquiries conducted by the User.

4 SPECIAL TERMS AND CONDITIONS

This Phase I Environmental Assessment for Malibu Civic Center Wastewater Treatment Facility Project in Malibu, California has been prepared specifically for RMC Water and Environment.

The report has been prepared in accordance with the care and skill generally exercised by reputable professionals, under similar circumstances, in this or similar localities. No other warranty, express or implied, is made as to the professional opinions presented herein.

No other party, known or unknown to SCS, is intended as a beneficiary of this work product, its content or information embedded therein. Third parties use this report at their own risk. Third party reliance letters may be issued on request to SCS subject to approval of RMC Water and Environment and payment to SCS of a fee for such letters.

5 LIMITATIONS AND ASSUMPTIONS

The investigation focused on releases and threatened releases of hazardous substances or petroleum products that could be considered a recognized environmental condition and/or a liability due to their possible presence in significant concentrations (e.g., above acceptable limits set by the Federal or state government) or due to the potential for contaminant migration through exposure pathways (e.g., groundwater). Materials that may contain substances which are not currently deemed hazardous by the federal or state of California EPA were not considered as part of this study.

Unless specifically included in our scope of services, formal surveys for asbestos-containing materials, lead-based paints, fire safety, vapor intrusion, indoor air quality unrelated to releases of hazardous substances or petroleum products to the environment, mold, and similar matters were not part of this assessment. The Property was not evaluated for compliance with land use, zoning, wetlands, or similar laws. This report is not intended to be an environmental compliance audit.

Hazardous substances naturally occurring in plants, soils, and rocks, (e.g., heavy metals, naturally occurring asbestos, or radon) are not typically considered in these investigations. Similarly, construction debris (e.g., discarded concrete, asphalt) is not considered to be of concern unless observations suggest that hazardous substances are likely to be present in significant concentrations.

Unless otherwise noted, sampling and laboratory analyses of soil, water, air, building materials, or other media, were not performed as part of this investigation. Positive identification of hazardous substances can only be accomplished through sampling and appropriate laboratory analysis.

SCS Engineers assumes no responsibility for the accuracy of information obtained from, compiled by, or provided by third-party sources, such as regulatory agency listings. Unless obviously inaccurate or if information exists to the contrary, SCS Engineers assumes that information collected during this environmental site assessment is accurate and correct. Unless warranted, information collected has not been independently validated as part of this assessment.

The following information is the responsibility of the User (40 CFR 312.22) and is addressed in a questionnaire provided to the User and attached to this report as **Appendix G**:

- Specialized knowledge or experience of the User.
- The relationship of the purchase price to the fair market value of the Property. The purchaser of a Property is required to consider whether any differential between the

purchase price and the fair market value of the Property is due to the presence of releases or potential releases of hazardous substances at the Property.

The following limitations/restrictions were placed on SCS:

- Inspections were only conducted of publically accessible areas of the Property.
- SCS was unable to obtain access to the gated Malibu Colony community for inspection of Malibu Colony Road and pump stations 3 and 5.

6 GENERAL SITE CHARACTERISTICS

SITE LOCATION

The Property is located in Malibu, California within an area spanning approximately 1.15 by 2.13 miles. In general, the Property is bounded by Malibu Canyon Road to the west, mountainous area to the north (foothills of Santa Monica Mountains), Sweetwater Canyon Drive to the east, and the Pacific Ocean to the south.

GENERAL SITE DESCRIPTION

The Property consists of a proposed project area consisting of a Wastewater Treatment Facility (WTF), two injection well areas (IW1 and IW2), six pump stations (PS), and numerous piping runs as identified in Figure 2 in **Appendix A**. The WTF consists of Assessor Parcel Numbers (APNs) 4458-028-020 and -006 (94,210 square feet of land; this area was traversed by foot). An APN map of the WTF area is provided as Figure 3 in **Appendix A**. The pump station locations depicted on Figure 2 are general locations and SCS assumes the PS areas do not include an area greater than 20 feet by 20 feet (an inspection of the general area depicted on the map was conducted by traversing on foot, with the exception of PS3 and PS5 where access was not available). The two injection well sites were also traversed by foot. The piping runs were observed by driving the piping routes (with the exception of Malibu Canyon Road which was not accessible).

ADJOINING PROPERTY USE

Based on the project area, the adjoining property use is too great to discuss in detail. However surrounding use includes numerous businesses including retail shopping centers (restaurants, grocery store, dry cleaners, gas station, and retail stores), civic center, library, laboratory, residences, etc. Properties of environmental concern are further discussed in later sections of this report.

7 PHYSICAL SETTING

PHYSIOGRAPHIC SETTING

The Property is located in the southern margins of the Santa Monica Mountains, extending from the coastline to approximately one mile inland, with an elevation change from sea level to as much as approximately 430 feet above mean sea level (msl). Site topography varies

significantly, but the regional topography slopes to the south towards the Pacific Ocean. Several strands of the Malibu Coast Fault run east-west through the Property. Malibu Creek runs generally north to south through the eastern portion of the Property.

GEOLOGY AND SOILS

According to a geological map of the Malibu Beach Quadrangle (Dibblee, 1993), surface sediments in this area consist of either Quaternary alluvial deposits derived from the bedrock of the Santa Monica Mountains, or outcrops of the Santa Monica Mountains themselves. The Quaternary alluvial deposits are mostly present along the coast and Malibu Creek, and include stream deposits of sand and gravel, beach sands, landslide debris, and older alluvium which is locally weakly consolidated and dissected where elevated. Bedrock outcrops in the area include the steeply dipping late Miocene Monterey Formation (fractured siliceous shales), the Miocene Topanga Formation (mostly sandstone), Oligocene Sespe Formation (nonmarine sandstone and conglomerates), the Miocene Conejo Volcanics (basaltic flows and breccia), and diabase sills and dikes of early Miocene age.

GROUNDWATER

The bedrock of the Santa Monica Mountains is generally considered to be non-water bearing, although minor groundwater may be encountered in more permeable beds of the sedimentary rocks or in fractured bedrock. The unconsolidated Quaternary alluvial deposits along Malibu Creek are locally water bearing. In the lower elevation coastal areas, groundwater can occur at 5 to 10 feet below the ground surface and flows southerly, towards the coast. Based on available information, groundwater at the WTF is located at a depth of 43 feet bgs. Local groundwater quality in the coastal Malibu Creek area has been impacted by discharges from septic systems, as well as from other sources such as leaking underground tanks (discussed later in this report).

RADON

According to the California Department of Health Service's May 2010 Radon Program report, screening in the area of the Property (90265 zip code) found 6 of 67 locations where buildings had radon levels greater than or equal to 4 pCi/L (the EPA action level). Based on the available information, therefore, elevated radon gas is not expected in the area of the Property.

8 SITE INSPECTION

An inspection of the Property and surrounding area was conducted on November 21, 2013, by Jessica Dillon and Ashley Hutchens of SCS. The inspection included a drive-by inspection of the pipeline runs and traversing the wastewater treatment facility (WTF), pump station (PS) areas, and injection well (IW) areas by foot. Photographs of the WTF, PS, and IW areas of the Property are provided in **Appendix B**.

WASTEWATER TREATMENT FACILITY

The accessible areas of the WTF Property were traversed by foot. This area is currently occupied by an existing wastewater treatment plant for the Malibu Colony Plaza shopping center. Access to the WTF Property was provided by Carlos Alvarez and Golan Kfir of Integrated Performance

Consultants (IPC), the current operators of the existing wastewater treatment plant. The WTF area ranges in elevation from 83 to 130 feet above msl. The treatment includes a physical process (to separate solids from liquids), a biological process (aeration and recirculation), and a chemical process (addition of chemicals for treatment) prior to testing of effluent and discharging to seepage pits on the WTF Property.

These processes include use of several large clarifiers, four above ground storage tanks (ASTs) for wastewater circulation, two ASTs for chemical storage (sodium hypochlorite and sodium bisulfate), an approximately 50,000 gallon underground storage tank (UST) that holds the treated effluent prior to discharge, and an injection field comprised of approximately 12 injection zones (each consisting of up to 8 injection wells/seepage pits). An aerial view of the WTF Property (provided by Mr. Kfir) is provided as Figure 4 in **Appendix A**.

The treatment ASTs are located within a concrete bermed area. In addition, the chemical storage ASTs, also located within the concrete bermed area, were within secondary containment tanks. The effluent is tested approximately daily prior to discharge from the seepage pits into the subsurface.

Five groundwater monitoring wells are located around the perimeter of the WTF Property as depicted on Figure 4. According to Mr. Alvarez, the wells are monitored quarterly by IPC and reports submitted to the Los Angeles Regional Water Quality Control Board (RWQCB) as part of the WDR (waste discharge requirement) permit.

Mr. Alvarez indicated IPC has been running the WTF for approximately 6 years and that the plant underwent major upgrades in 2006. IPC is currently only using 5 of 12 zones for reinjection of the treated effluent because the remaining zones have been assessed to be too deep to provide the required zone of separation from the groundwater table (according to information provided by Mr. Kfir, the average groundwater level is approximately 43 feet bgs). Mr. Alvarez indicated that they are currently in compliance with their WDR permit.

INJECTION WELL AREAS

Injection Well Area 1 (IW1)

Injection Well Area 1 (IW1; designated on Figure 2) was traversed by foot. IW1 is located in Malibu Road just south of the Malibu Colony Plaza shopping center. IW1 spans a distance of approximately 1,400 feet along Malibu Road west of its intersection with Webb Way. IW1 is bounded to the south by numerous residences, a fire station (a 1,000 gallon diesel AST was observed at the southwest corner of the fire department site), and a commercial strip center at the eastern end. A drycleaner facility (Spic & Span cleaners) was observed adjacent to the southeast of the eastern boundary of IW1.

Various restaurants, banks, grocery, retail stores and a drycleaner facility (Ogden cleaners) are located within the Malibu Colony Plaza shopping center. The drycleaner is located towards the western portion of the strip center. Two monitoring wells were observed on the south end of the shopping center property behind the drycleaner space (a clarifier was also observed in area behind the drycleaner). Three additional monitoring wells were observed on the north side of Malibu Road in the area of the drycleaner and one monitoring well was observed on the south

side of the road between the residences at 23746 and 23750 Malibu Road (these wells are further discussed below).

Injection Well Area 2 (IW2)

IW2 (designated on Figure 2) was traversed by foot. The southwest corner of this area is occupied by a medical building that includes an urgent care and a pharmacy. The remaining portion of IW2 is occupied by Legacy Park which has a walking path and serves as part of a stormwater treatment system for water prior to entering Malibu Creek.

A clarifier apparently associated with the septic system for the medical building was observed at the northwest side of the parking area for the building. Three monitoring wells were observed on the north side of the parking area between Webb Way and the clarifier.

PUMP STATION AREAS

Pump Station 1 (PS1)

The area in Malibu Road depicted as PS1 on Figure 2 was traversed by foot. An enclosure with six ASTs and other equipment (potentially an existing pump station) was observed in the area (near 24572 Malibu Road) on the north side of Malibu Road and is reported by personnel at the City of Malibu to be a disinfection facility for treating dry weather flows associated with the Marie Canyon area. PS1 is presumed to be located to the east of this facility.

Pump Station 2 (PS2)

The area of PS2, observed to be at the northwest corner of the parking lot associated with Malibu Bluffs, was traversed by foot. The PS2 area is paved asphalt with a bank to the north buffering between the parking lot and Pacific Coast Highway. A nature path was observed to the west of the area.

Pump Stations 3 and 5 (PS3 and PS5)

PS3 and PS5 were not accessible. These two pump stations are located in Malibu Colony Road and are in a gated residential neighborhood.

Pump Station 4 (PS4)

The area of PS4 was traversed by foot. PS4 will be located in or at the edge of the east end of Legacy Park.

Pump Station 6 (PS6)

The area of PS6 was traversed by foot. PS6 is located within Pacific Coast Highway, west of the Malibu pier and at the east end of at the public parking lot for beach access.

PIPELINE AREAS

Pipeline runs were observed by driving the roadways where pipelines are proposed. The pipeline within Malibu Colony Road was the only area not accessible for observation. During the site inspection, various utilities (water, sewer, etc.) were observed within the streets and various utility boxes (transformers, electrical vaults, aboveground water pipes) were observed adjacent to the streets. In addition, several monitoring wells (presumably groundwater) were observed in Malibu Road at the following locations:

- Two wells were observed on the north side of the road towards the west end of Malibu Road near the address of 24246 Malibu Road.
- Three wells were observed on the north side of the road near the addresses of 23826 and 23832 Malibu Road (within IW1 as previously discussed).
- One well was observed on the south side of the road between the addresses of 23746 and 23750 Malibu Road (within IW1 as previously discussed).

Observations of additional environmental concerns adjacent to pipeline areas include the following:

- Spic and Span drycleaners located south/southeast of the intersection of the pipelines in Malibu Road and Webb Way.
- Ogden drycleaners located in the Malibu Colony Plaza shopping center located north of the pipeline in Malibu Road.
- A Chevron gasoline station located east of the Webb Way pipeline at its intersection with Pacific Coast Highway (groundwater wells were observed at this facility).
- A Shell gasoline station located at the northeast corner of the intersection of pipelines in Pacific Coast Highway and Cross Creek Road.
- Colony Cleaners located in the Malibu Country Mart shopping center approximately 330 feet east of the pipeline in Cross Creek Road.

NATURAL DRAINAGE

As previously discussed the Property is located in the Civic Center area of Malibu and site topography varies significantly throughout the project site. Natural drainage is present throughout the canyon areas of the Property. In addition, a stormwater system exists throughout the Property to treat stormwater prior to reuse for irrigation or discharging to Malibu Creek. Malibu Creek runs generally north to south through the eastern portion of the Property.

WELLS

As previously noted and discussed, numerous wells were observed in the streets where pipelines are proposed and within the proposed Injection Well areas.

ELECTRICAL EQUIPMENT

Electricity in the area of the Property is provided by Southern California Edison (SCE). Various transformers and electrical vaults are located within the Property area. SCE has stated that they

have never specified the purchase of distribution transformers utilizing PCBs as the insulating/cooling fluid. SCE transformers utilize mineral oil exclusively. In a statistically valid test of over 20,000 SCE distribution transformers, SCE determined that the concentrations of PCBs in the mineral oils was less than 50 parts per million (ppm) in over 96 percent of the units. Based on the available information, no significant environmental impact to the Property is anticipated from this transformer.

DRINKING WATER

Drinking water to the area is supplied by the Los Angeles County Department of Public Works (Waterworks) District Number 29. All large public water suppliers in California have been required to test their water and comply with federal and state drinking water standards since the mid-1980s. Consequently, lead and other contaminants of concern are not expected to be present above applicable primary and secondary drinking water standards.

9 INTERVIEWS

As previously discussed (Section 8), Mr. Carlos Alvarez and Mr. Golan Kfir provided access and were interviewed during the site inspection regarding the WTF Property.

10 SITE HISTORY

Site history was evaluated from the following sources:

- Historic U.S. Geological Survey (USGS) topographic maps provided by Environmental Data Resources (EDR) (November 5, 2013).
- Historical aerial photographs dating from 1928, 1938, 1947, 1956, 1960, 1968, 1976, 1989, 1994, and 2002 provided by Environmental Data Resources (EDR) (November 13, 2013).
- City of Malibu Department of Building and Safety building permit information.
- A search was made of the EDR-Sanborn collection and no maps of the Property were found.
- City Directory review report provided by EDR (November 15, 2013).

Copies of historical topographic maps, aerial photos, city directories, and building department records are included in **Appendix C**.

WASTEWATER TREATMENT FACILITY

Year	Description	Source
1928	The WTF Property appears to be vacant or agricultural on the southeastern end and forested at the northwestern portion.	Aerial Photo
1938	The WTF Property appears to be occupied by an orchard.	Aerial Photo

Year	Description	Source
1947	The WTF Property appears vacant with a dirt road running down the middle from in the northwest to southeast direction. A road is present where Civic Center Way's is currently located. Pacific Coast Highway (PCH) is being constructed south of the WTF. Grading had been conducted within the WTF area.	Aerial Photo
1951	PCH was rerouted at its current location just inland from the coast.	Topographic Map
1956	The WTF appears to have shrubbery on the northwest and southeast ends. A dirt road appears present at the northwest boundary.	Aerial Photo
1960	The WTF appears similar to the 1956 photo.	Aerial Photo
1968	The WTF appears similar to the 1960 photo.	Aerial Photo
1976	The WTF appears similar to the 1968 photo with some heavier shrub coverage.	Aerial Photo
1988	Building Permits associated with 23733 Malibu Rd depict information on septic tank and seepage pit details	Building Permits
1989	The northwest portion of the WTF appears to be void of vegetation; the remaining portion of the WTF appears to be heavily covered with shrubbery.	Aerial Photo
1994	The WTF appears similar to the 1989 photo.	Aerial Photo
1996	Building permits associated with 23715 Malibu Rd depict an existing 45,000 gallon septic tank and leach field at the WTF Property.	Building Permits
2002	A larger portion of the WTF appears void of vegetation, similar to its current status.	Aerial Photo

INJECTION WELL AREAS

Year	Description	Source
1928	PCH appears to run through IW1. Residences appear to be present to the south of a portion of IW1. IW2 appears to be vacant or agricultural.	Aerial Photo
1932	PCH is depicted running along the coast (currently Malibu Rd.) through IW1.	Topographic Map
1938	PCH is runs through IW1. A potential gas station appears present to the north of IW1 along with some other new (indiscernible) development since the 1928 photo. IW2 appears similar to the 1928 photo.	Aerial Photo
1947	A large structure is present north of IW1. The potential gas station remains present. IW2 is vacant and PCH is being constructed south of IW2.	Aerial Photo

Year	Description	Source
1956	IW1 and IW2 appear similar to the 1947 photo with the exception of the larger structure to the north of IW1 is no longer present however the gas station was still observed. Webb Way is present to the east of IW1 and west of IW2. PCH is complete south of IW2. A potential gas station is visible across PCH to the southeast of IW2.	Aerial Photo
1957	A building permit is on record for the demolition of a service station/garage at 23757 Malibu Road to the north of IW1.	Building Permits
1960	The structures north of IW1 have been demolished and a new structure is present north of the west end of IW1. IW2 appears similar to the 1956 photo with the exception that a dirt road appears to traverse the southern portion.	Aerial Photo
1966	A Statement of Water Service was on record indicating the presence of a gas station at 23641 PCH, east of IW2.	Building Permits
1968	The area south of IW1 is completely developed with structures. IW2 appears similar to the 1960 photo with the exception of a gas station in the area east of IW2.	Aerial Photo
1971	A building permit was on record indicating a gas station remained present at 23641 PCH.	Building Permits
1975	Gas stations were present at 23614 PCH on the south side of the road, to the southeast of IW2 and at 23670 PCH south of the southwest portion of IW2. A gas station was also listed at 23641 PCH (east of IW2). A grading permit dated September 1975 was on file to rework soil for new building at 23661 PCH.	City Directories, Building Permits
1976	The area around IW1 appears similar to the 1968 photo. A structure is present at the location of the current structure on IW2; the rest of IW2 remains unchanged. Gas stations appear present adjacent to the southwest corner and the southeast corner of IW2 across PCH.	Aerial Photo
1980, 1985	The gas stations at 23614 PCH, 23670 PCH, and 23641 PCH remained present. The structure at 23661 PCH (current address of building on IW2) was occupied by Century Federal Savings/Loan.	City Directories
1987	A letter dated September 21, 1987, indicates that the California Coastal Commission granted permission on December 18, 1985 for the development of a 99,300 square foot shopping center.	Building Permits
1989	The area north of IW1 has been developed with the shopping center similar to its current configuration. IW2 appears similar to the 1976 photo.	Aerial Photo
1990, 1996	Ogden's One-Hour Cleaners was listed at 23823 Malibu Road (north side of the road). The gas station at 23670 PCH remained present; there was no listing for 23614 PCH. The structure at 23661 PCH remained occupied by Century Federal Savings/Loan in 1990 but no listing was made for this address in 1996.	City Directories
1994	IW1 and IW2 appear similar to the 1989 photo.	Aerial Photo
2002	IW1 and IW2 appear similar to the 1994 photo. The gas stations discussed above remain present.	Aerial Photo

Year	Description	Source
2010	A building permit for 23700 Malibu Rd (southeast of IW1) indicates the structure is occupied by a drycleaner.	Building Permits
2000, 2005, 2010	Ogden's One-Hour Cleaners was listed at 23823 Malibu Road (north side of the road). Gas stations remained present at 23614 PCH and 23670 PCH. The structure at 23661 PCH was occupied by Coldwell BKR SLS.	City Directories

PUMP STATION AREAS

Year	Description	Source
1928	PCH runs in the area of PS1 and PS6 the area to the north and south appears vacant or beach property. PS2 appears to be in an undeveloped or agricultural area. Residences are located on the south side of the road where PS3 and PS5 are located. A road runs through the area of PS4 and the surrounding area is vacant or agricultural.	Aerial Photo
1932	PCH is depicted running along the coast (currently Malibu Rd.) in the area of PS1.	Topographic Map
1938	The area near PS1 is not depicted on the photo. PS2 appears similar to the 1928 photo. PS3 and PS5 appear similar to the 1928 photo with the exception that Malibu Colony Road appears to be wider with some residential development on the north side. PS4 appears similar to the 1928 photo, the area to the northeast appears to have been cultivated. PS6 appears similar to the 1928 photo.	Aerial Photo
1947	PS1 appears similar to the 1938 photo. PS2 is south of PCH which appears to be under construction. PS3, PS4, PS5, and PS6 appear similar to the 1938 photo.	Aerial Photo
1956	Dwellings are present in the area south of PS1. PCH is present north of PS2. PS3 and PS5 appear similar to 1947 photo with the exception of some additional residences in the area. PS4 and PS6 remain unchanged.	Aerial Photo
1960	PS1 is not visible in the photo. Construction/grading are present in the area of PS2. PS3, PS4, PS5, and PS6 appear similar to the 1956 photo.	Aerial Photo
1968	The south side of Malibu Road in the area of PS1 is heavily developed with residences. The street and a structure associated with the park are present near PS2. PS3, PS5, and PS6 remain unchanged. Some development and parking area present north of PS4.	Aerial Photo
1976	PS1, PS2, PS3, PS5, and PS6 areas appear similar to the 1968 photo. The area north of PS4 has been developed with a large structure similar to the current development.	Aerial Photo

Year	Description	Source
1989	PS1, PS3, PS4, PS5, and PS6 areas appear similar to the 1976 photo. The area of PS2 appears to be under grading or construction.	Aerial Photo
1994	PS1, PS3, PS4, PS5, and PS6 areas appear similar to the 1976 photo. The area of PS2 appears to be at the northwest corner of a parking lot similar to its current condition.	Aerial Photo
2002	All of the pump station areas appear similar to the 1994 photo.	Aerial Photo

PIPELINE AREAS

Year	Description	Source
1928	The south side of Malibu Colony (south of Malibu Colony Road) is developed with residences. PCH is depicted running adjacent to the coast on the western portion of the Property. The areas north of PCH on the east and west side of the project area appear mostly undeveloped with some agricultural areas. Building permits indicate this portion of PCH was historically called Roosevelt Highway.	Aerial Photo, Building Permits
1932	The area of the Property is depicted with several unimproved roads. PCH is depicted running along the coast (currently Malibu Rd.).	Topographic Map
1938	The area looks similar to the 1928 photo. As previously discussed, a potential gas station appears present to the north of the pipeline running through Malibu Rd and IW1.	Aerial Photo
1947	PCH is being constructed at its current location. Portions of Civic Center Way and Malibu Canyon Rd. are present on the west side of the project area. It appears that many of the roads on the eastern portion of the Property are also present.	Aerial Photo
1951	PCH was rerouted at its current location just inland from the coast. Malibu Canyon Rd. was present on the west side of the Property and Serra Rd and Cross Creek Rd were present on the east side.	Topographic Map
1956	PCH is complete at its current location and Civic Center Way (where it runs parallel to PCH) and Webb Way are present. The potential gas station north of Malibu Rd was still present.	Aerial Photo
1957	A building permit is on record for the demolition of a service station/garage at 23757 Malibu Road to the north of the pipeline in Malibu Rd.	Building Permits
1967	Many new structures were present within the boundary of the Property.	Topographic Map
1968	The area appears similar to the 1960 photo. A gas station appears to be present at the northeast corner of the intersection of Cross Creek Road with PCH.	Aerial Photo

Year	Description	Source
1976	An extension of Malibu Canyon Road to PCH is present on the west side of the Property. All of the roads appear to be present similar to their current condition. A gas station appears to be at the southeast corner of the intersection of Webb Way and PCH.	Aerial Photo
1975, 1980	Spic & Span Cleaners was listed at 22941 PCH (north side of the road). A gas station was present at 23387 PCH (at the intersection with Cross Creek Rd). A gas station was also present at 23670 PCH, adjacent to the east of the Webb Way pipeline.	City Directories
1985	Landmark Cleaners was listed at 23410 Civic Center Way (unit 3D). Spic & Span Cleaners remained at 22941 PCH. Gas stations remained present at 23387 PCH and 23670 PCH.	City Directories
1989	Many of the structures throughout the Property appear similar to their current configuration.	Aerial Photo
1994	The Property appears similar to the 1989 map.	Aerial Photo
1990, 1996	Landmark Cleaners remained listed at 23410 Civic Center Way (unit 3D). Ogden's One-Hour Cleaners was listed at 23823 Malibu Road (north side of the road). Spic & Span Cleaners remained at 22941 PCH and gas stations remained present at 23387 PCH and 23670 PCH.	City Directories
2002	The Property appears similar to the 1994 map. The gas stations at the northeast corner of the intersection of Cross Creek Road and at the southeast corner of the intersection of Webb Way and PCH remain present.	Aerial Photo
2000, 2005, 2010	Ogden's One-Hour Cleaners remained listed at 23823 Malibu Road, Spic & Span Cleaners remained at 22941 PCH, and gas stations remained present at 23387 PCH and 23670 PCH.	City Directories

HISTORICAL USE SUMMARY

Wastewater treatment facility

The WTF area appeared to be vacant or agricultural land as early as 1928. Although it is not possible to determine when this area began to be used for waste treatment and a leach field, aerial photos depict the land as a vacant area with a dirt road as early as 1947 indicating it could have been used as such at that time. Permits first indicate its use for septic tank and seepage pits (leach field) by 1988.

Injection Well Areas

IW1 is located in Malibu Road which was formerly a portion of Pacific Coast Highway (also known as Roosevelt Highway). A gas station was present at 23757 Malibu Road from at least 1938 to 1957, north of IW1 and the pipeline running through Malibu Rd. The current shopping center present to the north of IW1 was constructed between 1987 and 1989 where Ogden Cleaners has been present from at least 1990 to present.

IW2 appeared to be vacant until the current structure at 23661 Pacific Coast Highway was constructed around 1975 for use as a bank. Additional gas stations were present in the area of IW2 at 23641 Pacific Coast Highway (east of IW2) from at least 1966 to 1985, at 23614 Pacific Coast Highway (southeast of IW2) from at least 1956 to 2010, and 23670 Pacific Coast Highway (south of IW2) from 1975 and is currently still present.

Pump Station Areas

With the exception of PS2, the pump station areas were observed to be part of existing roadways since at least 1928. PS2 was in an undeveloped or agricultural area until the construction of Pacific Coast Highway was observed to the north of it in 1947. By 1960 grading in the area of PS2 was observed for construction of the park road nearby. By 1989, additional construction was observed resulting in the area similar to its current layout. The areas surrounding PS1, PS3, and PS5 have always been residential.

Pipelines

Malibu Road appears to have formerly been a portion of Pacific Coast Highway (previously known as Roosevelt Highway) until Pacific Coast Highway was rerouted in approximately 1947. A gas station was present at 23757 Malibu Road from at least 1938 to 1957, north of the pipeline running through Malibu Rd and IW1. The current shopping center present to the north of IW1 was constructed between 1987 and 1989 where Ogden Cleaners has been present from at least 1990 to present. Gas stations were also present at 23670 Pacific Coast Highway (east of the Webb Way pipeline) from at least 1975 to present and at 23387 Pacific Coast Highway (at the intersection with Cross Creek Rd) from at least 1968 to present. Additional drycleaner facilities were observed at 23410 Civic Center Way (Landmark Cleaners adjacent to Civic Center and Cross Creek pipelines) from at least 1985 to 1999 and Spic & Span Cleaners currently located at 23680 Malibu Rd (southeast of Malibu Rd and Webb way pipeline intersection) and was formerly located at 22941 Pacific Coast Highway (north of the pipeline) from at least 1975 through 2010. All of the roads appear to be present similar to their current condition by 1976.

11 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

In order to identify commonly known or reasonably ascertainable information about the Property, SCS reviewed previous environmental reports and various regulatory agency files and interviewed regulatory agency personnel. The following information was identified.

PREVIOUS ENVIRONMENTAL REPORTS

No previous environmental reports were provided to SCS for review.

REGULATORY AGENCY RECORDS

Local regulatory agencies and other sources were contacted in an effort to identify any known or suspected contamination sites or incidents of hazardous waste storage or disposal which might have resulted in soil or groundwater contamination within a one-mile radius of the Property. Within the City of Malibu, the Los Angeles County Department of Public Works (LADPW)

generally acts as the lead enforcement agency for underground storage tank compliance. If a tank has leaked and groundwater contamination is suspected, the Los Angeles Regional Water Quality Control Board (LARWQCB) generally becomes the lead agency in supervising contaminant characterization and cleanup. The Los Angeles County Fire Department, Health Hazardous Materials Division (HHMD) generally acts as the lead agency for hazardous material compliance.

Los Angeles County Department of Public Works (LADPW)

A request for files was made to the LADPW for addresses associated with the WTF, injection well areas, and pump station locations. The LADPW indicated six files were available, however during review, only three actually had records available for review as follows:

23720 W. Malibu Rd. – This file is associated with the Los Angeles County Fire Department Station #88. Records indicate the facility formerly had a 550-gallon diesel UST located at the southwest corner of the facility. The single-walled UST was reportedly installed in 1954 and removed in 1996. The closure report indicates sampling results from beneath the UST were non-detect for diesel range hydrocarbons and oil range hydrocarbons were detected at a maximum concentration of 33 milligrams per kilogram, well below regulatory limits.

23725 W. Malibu Rd. – This file is associated with the former Granita Restaurant. The file was associated with the septic tank/leach field and a 4,000 gallon grease interceptor located north of the shopping center.

23755 W. Malibu Rd. – This file is associated with the Colony Pantry Restaurant. The file was associated with a septic tank/leach field and a 4,500-gallon 3-stage grease interceptor located south of the shopping center.

Copies of available records are included in **Appendix D**.

Los Angeles County Fire Department (LACFD)

A request for files was made to the LACFD for addresses associated with the WTF, injection well areas, and pump station locations. A request for files was made to the LACFD, however no response was received at the time of this report.

12 REVIEW OF FEDERAL, STATE, TRIBAL, AND LOCAL GOVERNMENT DATABASES

A database search for sites listed on various federal, state, tribal, and local databases in the area around the Property was obtained from EDR (November 8, 2013). A description of each of the databases searched is included in the report, which is attached as **Appendix E**. Among the databases included in the EDR report are NPL (federal, tribal, and state-equivalent), proposed and delisted NPL, CORRACTS (RCRA facilities subject to corrective actions), hazardous waste sites identified for investigation or remediation (CERCLIS, State CERCLIS, VCP, Brownfields Calsites, etc.), LUST, sites with engineering controls, former CERCLIS (NFRAP), RCRA and state hazardous waste generators, ERNS, SWLF, USTs, and Toxic Pits.

The review of the records satisfies all requirements as set forth in 40 CFR Section 312.26 (b) and (c) with regard to the review of federal, tribal, and state government records of databases of such government records and local government records and databases of such records pertaining to both the subject property and the nearby or adjoining properties. Further, the search distances for each particular database are as specified in 40 CFR 312.26.

Any known or suspected contaminated sites included on these lists within 0.25 miles of the Property are discussed in the following text. As a general rule, sites beyond 0.25 miles are not anticipated to impact a site significantly. Any sites beyond 0.25 miles with a high potential to impact the Property are also discussed. (Please note: the distances and directions listed in this report have been field verified and might not always match those in the EDR report.)

Sites such as TSD facilities, hazardous waste generators, HAZNET, FINDS, SQGs, LQGs, USTs, HIST UST, RCRA violations, and TRIS facilities with toxic chemical releases (generally in accordance with permitting requirements - into the air, water, or land as reported under SARA Title III) use or store hazardous materials and thus may pose a potential problem in the event of a spill or leak. However, unless these sites also appear in an agency list of contaminated sites, there is no evidence of any problems at this time. Therefore, sites on these lists will not be discussed unless on or in close proximity to the Property.

Please refer to **Appendix E** for further information on these sites.

DATABASE SITES WITHIN PROPERTY BOUNDARY

The EDR database lists the following sites within the Property boundaries. Some sites may be listed on more than one database. Listed sites in the area of the Property include the following, but are not anticipated to affect the Property:

Octopus Holdings LLP/Cross Creek, 3469 Cross Creek Rd (HAZNET, NPDES) – This facility disposed of unspecified oil-containing waste for offsite disposal and maintained an NPDES permit during construction.

Presbyterian Church, 3324 Malibu Canyon Rd (HAZNET, NPDES) – Available information indicates this facility reportedly disposed of other inorganic solid waste for offsite disposal and maintained an NPDES permit during construction.

Allied Nursery, 23849 Stuart Ranch Rd (NPDES, LA Co Site Mitigation) – This facility reportedly maintained an NPDES permit during construction. No information regarding the type of LA Co Site Mitigation case is available however indicates LA County is providing oversight for this facility.

Malibu Inn Restaurant, 22969 Pacific Coast Hwy and **Jimmy's Ribs at the Beach**, 22935 Pacific Coast Hwy (EMI) – These facilities are permitted with the South Coast Air Quality Management District. No other information was available.

Calif Parks-Santa Monica Mnt/Malibu Pier State Park, 23000 Pacific Coast Hwy (LA Co HMS, WDS, UST, HIST UST, SWEEPS UST, ENF) – This facility is a municipal/domestic facility that treats sewage or sewage mixture and is considered a

minor threat to water quality. An NOV was issued in August 2008 for overdue monitoring reports and in 2009 for one effluent violation. The facility formerly had USTs however no leaks have been reported.

Dominos Pizza/Malibu Country Mart III, 3900 S Cross Creek Rd (LA Co HMS, WDS, ENF) - This facility is a municipal/domestic facility that treats sewage or sewage mixture and is considered a minor threat to water quality. This facility received numerous NOVs for the following: a TSO violation, overdue monitoring reports, missing data, and receiving water exceedances.

23440 Civic Center Way (HAZNET, WDS, Hist Auto Station) – Various doctors at this location are listed as manifesting photochemicals/photoprocessing wastes, presumably from X-Rays for disposal. This facility is a municipal/domestic facility that treats sewage or sewage mixture and is considered a minor threat to water quality. In addition, Shens Auto Detail was listed at this address in 2002.

County Sanitation Dist/Civic Center Rear lot/Malibu Administrative Center, 23519 Civic Center Way (HAZNET, WDS, LA Co HMS, ENF) – Hazardous waste records indicate over 60 HAZNET listings for disposal of household waste, aqueous solutions with total organic residues, pesticide rinse water, waste/mixed oil, and unspecified organic liquid mixture. The facility is a municipal/domestic facility that treats sewage or sewage mixture and is considered a minor threat to water quality and received an NOV in 2009 for violations to the Order. The facility is listed on the LA Co HMS database as closed.

23822 Deville Way/23841 West Malibu Rd (CHMIRS) – These facilities are listed as having a contained sewage releases due to blockages in the lines.

Malibu Canyon Village/George Wilkinson, 23901 Civic Center Way (LA Co HMS, HAZNET) – This facility is listed as an open HMS case and hazardous waste records indicate disposal of asbestos containing waste.

Malibu Lagoon State Beach, 23200 Pacific Coast Highway (LA Co HMS, NPDES, ENF) – This facility is listed as a removed site on the HMS database, a historical site on the NPDES listing, and is listed as having a 2011 NOV for failure to submit quarterly reports.

Replanet LLC, 23841 Malibu Rd (SWRCY) – This listing is apparently for a recycling center located at the shopping center.

Fire Station #88, 23720 Malibu Rd (HIST UST, WDS, SWEEPS UST, LA Co HMS) – This facility reportedly had one diesel UST. This facility is also listed as a municipal/domestic facility that treats sewage or sewage mixture and is considered a minor threat to water quality and received an NOV in April 2009 for 23 effluent violations and unauthorized flow increase.

Pathway Diagnostics Corp, 3003 Malibu Canyon Rd (HAZNET) – This facility manifested latex waste, laboratory waste chemicals, unspecified solvent mixtures, aged or surplus inorganics for offsite disposal.

Grounds Maintenance Services/Burns Pacific Construction/ATC Associates Inc, 3650 Cross Creek Rd (HAZNET) - This facility reportedly manifested waste and mixed oil, aqueous solution with total organic residues (less than 10 percent), other monomer waste, and other organic solids for offsite disposal.

Longshore Pumping Co, 3724 Cross Creek Rd (HAZNET) – This facility disposed of waste and mixed oil and other organic solids at an offsite location.

Connies Kids, 3838 Cross Creek Rd (RCRA NonGen, FINDS, HAZNET) – This facility is listed as generating photochemicals/photoprocessing waste.

LA County-ISD, 23525 Civic Center Way (HAZNET) – Hazardous waste records indicate disposal of asbestos containing waste.

Ralphs Grocery #731, 23841 Malibu Rd (HAZNET) – Hazardous waste records indicate disposal of unspecified solvent, off-specification, aged or surplus organics

23706/23712/23919 Malibu Rd (HAZNET) – Doctors/Dentist/Veterinarian offices listed for disposal of photochemicals/photoprocessing waste, metal sludge.

Euphoria Malibu Inc, 23823 Malibu Rd (RCRA-SQG, FINDS) – This facility is reported as a small quantity generator with no listed violations.

CVS Pharmacy No 9697/Savon Drug 9697, 23805 Malibu Rd (RCRA-LQG, HAZNET, FINDS) – This facility is reported as a large quantity generator with no listed violations for disposal of ignitable hazardous wastes, wastes with high or low pH, mercury, and other pharmacy related wastes and over 190 hazardous waste listings under the HAZNET database primarily for pharmaceutical waste and photo processing chemicals.

Malibu Adobe Restaurant, 23410 Civic Center Way (LA Co HMS) – This facility is listed for having a leaking pad-mounted SCE transformer. Available information indicated site type as “road” and the substance was mineral oil (unknown PCB).

Market Basket/La Scala Restaurant, 23359 W Pacific Coast Hwy; **Malibu Deli,** 3894 S Cross Creek Rd; **Hughes Market,** 23765 Malibu Road; **The Adamson Companies,** 23231 W. Palm Canyon Ln (LA Co HMS) – No information is available on these facilities.

Serra Canyon Co, 23135 Palm Canyon (ENF) – Available information indicates there is a WDR associated with this facility, however the status indicates “historical”. A letter issuing a notice of violation (NOV) was sent in 2004 for overdue septic survey.

Serra Retreat Center, 3401 Serra Rd (WDS, ENF) – This facility maintained a WDR associated with domestic sewage and was considered a minor threat to water quality. An NOV was issued in April 2009 for 24 overdue monitoring reports.

Verizon – Malibu Facility, 3505 Cross Creek Rd (ENF) – Available information indicates there is a WDR associated with this facility, however the status indicates “historical”. An NOV was sent in 2004 for an overdue septic survey.

Malibu Racquet Club, 23847 Stuart Ranch Rd (ENF) – This facility maintained a WDR and received a NOV in August 2009 for failure to file reports.

D Bar Associates, 3700 Serra (ENF) - Available information indicates there is a WDR associated with this facility, however the status indicates “historical”. A letter was sent in 2004 for overdue septic survey.

Our Lady of Malibu Catholic Church, 3625 Winter Canyon Rd (ENF) – This facility maintained a WDR and received a NOV in July 2013 for failure to file reports.

Madelene Fobert, 3505 Coast View (ENF) – This facility has received an NOV for a WDR permit for overdue septic survey.

Finance Network LLC, 22965 Pacific Coast Hwy (ENF) – This facility received an NOV in 2004 for a WDR permit for overdue septic survey.

Malibu Shores Motel, 23033 Pacific Coast Hwy (WDS, ENF) – This facility is a municipal/domestic facility that treats sewage or sewage mixture and is considered a minor threat to water quality. This facility received NOVs in April 2009 and June 2012 for delinquent and overdue monitoring reports and excess flow.

Jack in the Box #160, 23017 Pacific Coast Hwy (WDS, ENF) – This facility is a municipal/domestic facility that treats sewage or sewage mixture and is considered a minor threat to water quality. This facility received NOVs in April and June 2009 for overdue monitoring reports and report deficiencies.

Malibu Lagoon Restoration Phase 2, 23400 Pacific Coast Hwy (NPDES) – This facility reportedly maintained an NPDES permit during construction.

Prudential Malibu Realty, 23405 W. Pacific Coast Hwy (WDS, ENF) – This facility is a municipal/domestic facility that treats sewage or sewage mixture and is considered a minor threat to water quality. This facility received an NOV in April 2009 for overdue monitoring reports.

Malibu Masonry Supply Inc, 3730 Cross Creek (NPDES) – This facility reportedly maintained an industrial NPDES permit.

Wave Property Inc., 3542 Coast View Dr (NPDES, ENF) – This facility maintained an NPDES permit during construction and has received an NOV for a WDR permit for overdue septic survey.

Malibu Creek plaza Shopping Center, 3822-3896 Cross Creek Rd (WDS, ENF) - This facility is a municipal/domestic facility that treats sewage or sewage mixture and is considered a moderate threat to water quality. This facility received an NOV in April 2000 for discharge of VOCs to groundwater and in 2009 for a time schedule order violation, late reports, and 38 effluent violations.

Malibu Country Mart I/II, 3835 Cross Creek Rd/23410 Civic Center Way (WDS, ENF) - This facility is a municipal/domestic facility that treats sewage or sewage mixture and is considered a minor threat to water quality. This facility has received various NOVs

between 2008 and 2012 for overdue and missing monitoring reports, missing data, effluent violations, and/or groundwater limit violations.

Surfrider Beach-Bath house, 23060 W Pacific Coast Highway (WDS, ENF) - The facility is a municipal/domestic facility that treats sewage or sewage mixture and is considered a minor threat to water quality and received an NOV in 2009 for late reports and missing data.

Malibu Mesa Wastewater Reclamation Facility, 3863 Malibu Canyon Drive (NPDES, ENF) - The facility is a municipal/domestic facility that treats sewage or sewage mixture and is considered a minor threat to water quality and received an NOV in 2009 for late reports and missing data. An NPDES permit for wastewater treatment was also in effect and is listed as historical.

23676-23712 Malibu Rd (ENF) – Listed as a municipal/domestic facility for domestic wastewater under a WDR.

Aqua Lion Unique, 23700 Malibu Rd (ENF) - Listed as a privately-owned business for wastewater under a WDR. An NOV was issued in August 2009 for failure to file reports.

23730 Malibu Road (WDS, ENF) - This facility is also listed as a municipal/domestic facility that treats sewage or sewage mixture and is considered a minor threat to water quality and received an NOV in April and August 2009 for overdue/late reports and incorrect flow data.

Malibu Road Groundwater Well Project, 23762 Malibu Road (ENF, NPDES) – Listed as an active NPDES site for Malibu City DPW. Available information indicates a utility structure, water supply and treatment system to meet priority pollutant limit Category 1. It is unclear what the groundwater well project is in reference to.

Malibu Legacy Park Project, 23500 Civic Center Way (NPDES) – This facility is located on IW2. This listing was apparently associated with a permit during construction of the park and has been terminated.

City of Malibu Groundwater Test Wells, 3939 Cross Creek Rd (NPDES, ENF) – Available information identifies this listing as water supply wells owned by Malibu City DPW. An NOV was issued in July 2013, however the reason is unknown, however a fee code indicates “require treatment to meet non priority limit category 2”.

3835 Cross Creek Rd (Hist Auto Station) – Automotive Legends was listed as an occupant at this address in 2003. No other information is available.

23805 Stuart Ranch Rd (Hist Auto Station) – A historical gas station was listed at this location in 2002).

The above-listed facilities within the Property boundaries are listed on the HAZNET, RCRA, NPDES, FINDs, WDS, ENF, Los Angeles Co HMS, LA Co Site Mitigation, Hist Auto Stations, EMI, UST, HIST UST, SWRCY, and/or CHMIRS. Considering the available information for each of the above-listed sites, none are anticipated to impact the Property for the purposes of the proposed project.

In addition, the following facilities within the Property boundary are listed as leaking sites or are have the potential to be a leaking site:

Hughes Research Lab/HRL Laboratories, LLC/Delphi Delco Electronic Systems/Charles Evans and Assoc/Boeing Electron Dynamic Devices, Inc., 3011 S. Malibu Canyon Rd. (LUST, Hist UST, ENF, Envirostor, EMI, RCRA NonGen/NLR, RCRA-LQG, RCRA-TSDF, CERC-NFRAP, CORRACTS, TRIS, FINDS, WDS, HAZNET, LA Co Site Mitigation) – This facility reportedly had a leaking diesel UST. The leak is reported as only affecting soil only, excavation and disposal occurred and the case has been closed. An “active” envirostor case with the Department of Toxic Substance Control indicates the aerospace facility has had releases of numerous chemicals of concern (including tetrachloroethene, trichloroethene, chromium III, mercury, polynuclear aromatic hydrocarbons, phosphorus) into soil and soil vapor. Hazardous materials records indicate that laboratory disposes of numerous waste chemicals, liquids with mercury, liquids with pH <2, numerous metals, and tetrachloroethene, cyanides, hydrogen phosphide, etc. under manifest to various offsite facilities (over 500 HAZNET listings are available). This facility is an uncharacterized RCRA treatment storage or disposal facility.

Hughes Research Laboratories/J&P Limited, 3806 S. Cross Creek Rd (LA Co HMS, HAZNET, ENF) – The Hughes Lab facility is listed as “removed” for facility and permit status under the LA Co HMS database and as manifesting of waste/mixed oil, liquids with mercury, oxygenated solvents, aqueous solution with total organic residues, liquids with pH less than 2 with metals, aged/surplus organics, polychlorinated biphenyls (or materials containing), asbestos containing waste, other inorganic solid waste. The J&P facility is listed as a historical domestic wastewater facility with a 2003 NOV for late reports.

GTE (Verizon) Malibu Plant Yard, 3705 Cross Creek Rd (LUST, AST, HIST UST, LA Co HMS, HAZNET) – This facility reportedly had a release of gasoline. The media affected is not reported, however, it appears both soil and groundwater were investigated and excavation was conducted. The case was closed in 2010. In addition, this facility disposed of hydrocarbon solvents, asbestos containing waste, tank bottom waste, etc. (over 90 HAZNET listings are available).

Cross Creek Yard/Adamson Companies Maintenance/1X Mallen Excavating, 3728 Cross Creek Rd (HIST UST, HAZNET, CA FID UST, SWEEPS UST, Hist Auto Stat, Hist Cortese, LUST, LA Co HMS) – This facility reportedly had four USTs, disposed of unspecified oil-containing waste at an offsite facility, and was a historical gas station (listed as auto and tire service) from at least 1999 to 2012. The facility reportedly had a release of diesel into an aquifer used for drinking water supply, however, the case was closed in 1996.

LA Co DPW Road 336/#436TS, 3637 S Winter Canyon Rd (LUST, LA Co HMS, UST, HAZNET, ENF, LA Co HMS, SWF/LF) – This facility reportedly had a leak of diesel into soil. The case is listed as “open-site assessment”. It appears that a case was closed in 1992 and reopened in 2001. This facility has over 100 HAZNET listing available for disposal of material offsite or by discharging to sewer/POTW or NPDES. In addition,

this facility is listed as an active solid waste facility (ID 19-AA-0306) for limited volume transfer operation of construction/demolition, inert material.

Santa Monica Malibu USD – Webster Elementary, 3602 Winter Canyon Rd (LUST, HAZNET, SWEEPS UST, LA Co HMS) – This facility reportedly had a release of other solvent or non-petroleum hydrocarbon (however, another reference indicates the substance as hydrocarbons) into soil and the case was closed in 1994. In addition, this facility manifests other organic solids for offsite disposal.

Malibu Shell/Texaco, 23387 Pacific Coast Hwy (LUST, UST, HAZNET, RCRA-SQG, LA Co HMS, FINDS, WDS, Hist Auto Stat) – This facility reportedly has three leaking UST cases for releases into the subsurface. Available information on GeoTracker indicates the first case (T0603701304) was listed as “completed-case closed” as of February 1995 for release of gasoline into aquifer used for drinking water supply. The second (0603792899) was listed as “completed-case closed” as of August 2004 for release of other solvent or non-petroleum hydrocarbon into aquifer used for drinking water supply, however available reports on GeoTracker indicates the contaminants do appear to be hydrocarbon-related and even though closure was granted, concentrations as high as 1,000,000 milligrams per kilogram of gasoline range hydrocarbons remained in soil. It appears a new case was opened in 2005 (0603768601) and the RWQCB issued a Directive to Take Corrective Action dated March 5, 2012. A workplan for additional investigation has been proposed, however a discrepancy makes it unclear if the proposed work is soil or soil vapor sampling.

Malibu Sheriff’s Station/LA Co DPW, 23555 Civic Center Way (HIST UST, UST, LUST, LA Co HMS, HAZNET) – This facility reportedly had four USTs, one of which leaked gasoline into soil (T0603701305) and the case was closed in 1996. This facility is listed several times on the LA Co HMS database as closed/removed and one as open, no other information is available. Hazardous waste records indicate over 50 HAZNET listings for disposal of various wastes including asbestos containing waste, waste/mixed oil, other organic solids, tank bottom wastes, pesticides, ages/surplus inorganics, hydrocarbon solvents, unspecified solvent mixture have been manifested at this facility from 1995 through at least 1999.

Chevron, 23614 Pacific Coast Highway (HIST UST, HIST CORTESE, LUST, RCRA-SQG, FINDS, HAZNET) – This facility reportedly had four USTs. The facility has two leaking UST cases, one for a leak into aquifer used for drinking water supply which was closed in 1996 (T0603701302) and the second of which is currently undergoing remediation (T0603786538). According to information available on GeoTracker, excavation of soil has been conducted on two occasions (August 1998 and November 2012) resulting in removal of 848 tons of soil. The facility ceased operation in December 2008 and was abandoned during the third quarter 2012, including demolition, UST removal, and onsite well abandonment (to allow for grading activities). Prior to demolition, the most recent groundwater sampling in June 2012 detected concentration of gasoline and diesel related hydrocarbons up to 2,400 and 1,100 micrograms per liter, respectively. Wells were proposed by Wayne Perry for reinstallation following site demolition. It appears AECOM is now the consultant and no updates on well installation are available.

Unocal #6267, 23670 Pacific Coast Highway (LUST, SWEEPS UST, HIST UST) – This facility is reported to have a closed leaking UST case for a release of gasoline into groundwater (T0603702667 –closed Dec 1996) and an open – remediation case (T0603799278). The most recent groundwater monitoring report (2nd Quarter 2013) indicates approximately 1,300 tons of soil was removed in 1997 and 2006, groundwater is present at approximately 9.88 feet above mean sea level and flows to the east. Gasoline-related hydrocarbons were most recently detected at 450 micrograms per liter (µg/l), methyl tertiary-butyl ether at 43 µg/l and tertiary-butyl ether at 7,300 µg/l.

Chevron Station 97213, 23641 Pacific Coast Highway (RCRA-SQG, NPDES, HIST UST, FINDS, LUST) – This facility reportedly has a closed leaking UST case for gasoline into groundwater (T0603701303 – closed Nov 1996). A well destruction report was on record for this site in March 1997.

Malibu Spic & Span Cleaners, 22941 Pacific Coast Hwy (RCRA-SQG, FINDS, EMI, HAZNET, Hist Cleaners) – This facility is listed as a generator of small quantities of hazardous waste (including perchloroethylene), however no violations or leaks are reported. This facility was listed as a cleaners from at least 2004 through 2008, however air permits date back to 1987.

Colony Cleaners, 3872 Cross Creek Rd (RCRA-SQG, FINDS, Hist Cleaners, Hist Cortese, LUST, Drycleaners, EMI, HAZNET) – Air permit records indicate this facility has been in operation since at least 1987. Hazardous waste records indicate that halogenated solvents (potentially including perchloroethene) have been manifested at this facility from 1995 through at least 2007. The facility is listed as a leaking UST case (T0603701306) for solvents into the aquifer used for drinking water supply. The case is listed as “completed-case closed” as of December 1993.

Landmark Cleaners, 23410 Civic Center Way (EMI, RCRA-SQG, FINDS, HAZNET) – This facility has had equipment permitted with the South Coast Air Quality Management District as early as 1987. Hazardous waste records indicate that halogenated solvents (potentially including perchloroethene) have been manifested at this facility from 1995 through at least 1999.

23680 Malibu Rd (Hist Cleaners) – Spic N Span Cleaners was located at this address in 2012.

Ogden Cleaners, 23823 Malibu Road (EMI, HAZNET, RCRA-SQG, FINDS) – This facility is listed as being permitted with South Coast Air Quality Management District as early as 1990. In addition, hazardous waste records indicate disposal of hydrocarbons solvents, halogenated solvents (including perchloroethene), and aqueous solutions.

Malibu Colony Plaza, 23705 Malibu Rd (SLIC, WDS, ENF) – This SLIC case is associated with the Ogden Cleaners (actual address of 23823 as discussed above) facility. The case is listed as “completed-case closed” as of June 2004 (SL204AY2349). The listing is associated with drycleaning operations at Ogden drycleaners. Available information, including a June 2004 No Further Action Letter, indicates that they dry cleaning machine using perchloroethene (PCE) was replaced by a closed-loop machine using hydrocarbon-based solution in October 2001. Air sparge/soil vapor extraction was

implemented in January 2002 and operated approximately one year, removing 73 pounds of VOCs. Confirmation sampling indicated a maximum PCE concentration of 1,500 micrograms per kilogram in soil. PCE in groundwater was non-detect after remediation. This facility is also listed as a municipal/domestic facility that treats sewage or sewage mixture and is considered a moderate threat to water quality.

Figure 5 of **Appendix A** depicts the locations of the above-referenced leaking or potentially leaking facilities within the Property boundaries.

OTHER DATABASE SITES

The EDR database lists the following sites within a one-mile radius of the Property boundaries. Some sites may be listed on more than one database. Sites of potential concern in the area of the Property include the following:

Arco #1033, 22661 Pacific Coast (Hist Cortese, LUST, CA FID UST, SWEEPS UST) – This facility is approximately 0.3 miles east of the pipeline in Pacific Coast Highway and reportedly had a release of gasoline into an aquifer used for drinking water. A summary review indicated that the site is 0.5 miles from the Pacific Ocean and high TPH/BTEX/MTBE concentrations were found (1,000 ppm) and 2 wells had free product sheen. Pump and treatment of groundwater was reportedly conducted and the case was closed in 2004. Based on distance and case status, this facility is not anticipated to impact the Property.

Shell/Avanti Management #7, 22729 Pacific Coast Highway – (LUST, UST, RCRA-SQG, FINDS, Haznet, CA FID UST, SWEEPS UST, LA Co. HMS) – This facility is 0.20 miles east of the pipeline in Pacific Coast Highway and reportedly has two leaking UST cases. One of the cases was for a release of gasoline into groundwater and was closed in 1996. The second is listed as “preliminary site assessment workplan submitted” for a release of gasoline (the media affected is not reported). The facility reportedly disposes of aqueous solutions and other empty containers (30 gallons or more) at offsite facilities.

C&K Self Serves, INC #5, 22721 Pacific Coast Hwy (HIST UST) – This facility reportedly had three USTs and was owned by Shell Oil Company. This may be associated with the Shell facility described above at 22729 Pacific Coast Hwy, is approximately 0.20 miles east of the eastern Property boundary and is not anticipated to impact the Property.

Star Cleaners/Dynasty Cleaners, 22837 Pacific Coast Hwy (RCRA-SQG, FINDS) – These facilities are listed as a generators of small quantities of hazardous waste, however no violations or leaks are reported. This facility is located approximately 260 feet east of the eastern Property boundary.

Unmappable or Orphan Sites

Twenty-three unmappable sites were identified in the EDR Report. Unmappable sites cannot be plotted due to inaccurate or incomplete addresses. Based on review of the provided data, including the estimated locations of the unmappable sites in relation to the Property, it appears

unlikely that the unmappable sites have adversely affected the environmental condition of the Property with the exception of one leaking UST (LUST) case at 3705 Cross Creek Road, which was discussed in the previous section of this report.

LANDFILLS

A review of the Major Waste Systems Map (June 1972) was conducted to locate any landfills or transfer stations within a one-mile radius of the Property, none of which were identified within one mile of the Property.

No active or inactive landfills were identified within 0.5 mile of the Property according to the EDR-provided Solid Waste Information System database.

OIL AND GAS WELLS

Available oil and gas well maps from the California Department of Conservation, Division of Oil, Gas and Geothermal Resources (DOGGR) were reviewed to identify oil and gas wells on the Property or in the nearby area. According to the Digital Online Mapping System (DOMS 2.1), no oil or gas wells have been drilled within one mile of the Property.

13 USER PROVIDED INFORMATION

A User Questionnaire was completed by RMC and is included in Appendix G. The provided information is discussed below.

TITLE RECORDS

No title report was provided to SCS for review.

ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

RMC indicated that the WTF Property is currently zoned Commercial Visitor – Serving 2 (CV-2). The proposed use will add a centralized wastewater collection and treatment facility as a conditionally permitted use while keeping intact all the uses allowed under the CV-2 zoning.

No other information regarding environmental liens or activity and use limitations was provided to SCS. No environmental liens or activity/use limitations were identified by SCS during the course of this assessment.

SPECIALIZED KNOWLEDGE

RMC indicated a portion of the WTF Property is currently being used as a wastewater treatment site, processing wastewater for the nearby shopping center. Based on information available to RMC, the current treatment system uses trickling filters to treat the influent and the resulting effluent is disinfected using hypochlorite, followed by dechlorination using sodium bisulfate prior to discharged to seepage pits.

VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

No property valuation information was provided to SCS.

1.4 DEGREE OF OBVIOUSNESS OF THE PRESENCE/LIKELY PRESENCE OF CONTAMINATION ON THE PROPERTY

As discussed above, the Property consists of an area in Malibu spanning approximately 1.15 by 2.13 miles and is generally bounded by Malibu Canyon Road to the west, foothills of Santa Monica Mountains to the north, Sweetwater Canyon Drive to the east, and the Pacific Ocean to the south. Sixteen facilities have been identified in the area that are considered to be recognized environmental conditions for the proposed wastewater treatment project. Based on SCS's understanding of the User's intent to install a centralized wastewater collection and treatment facility to include a WTF, injection well areas, pump stations, and pipelines, the facilities known to have releases or have the potential to have releases identified as recognized environmental conditions (i.e. leaking USTs, solvent use, drycleaners) have been identified on Figure 5 in **Appendix A**.

1.5 DATA GAPS

A data gap represents an inability on the part of the environmental professional to obtain information required by the standards and practices of 40 CFR 312 to fully identify conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the Property.

The following data gaps were identified:

- SCS was unable to obtain access to the gated Malibu Colony community for inspection of Malibu Colony Road and pump stations 3 and 5.

Based on observations of the other pump station and pipeline areas and the fact that Malibu Colony Road is a residential area, this is not considered a significant data gap.

1.6 FINDINGS AND OPINIONS

Based on the scope of work performed, SCS finds the following:

- The Property is located in Malibu, California within an area spanning approximately 1.15 by 2.13 miles. Generally, the Property is bounded by Malibu Canyon Road to the west, foothills of Santa Monica Mountains to the north, Sweetwater Canyon Drive to the east, and the Pacific Ocean to the south. The Property consists of a proposed project area consisting of a Wastewater Treatment Facility (WTF), two injection well areas (IW1 and IW2), six pump stations (PS), and numerous piping runs (identified on Figure 2 of **Appendix A**). The WTF consists of Assessor Parcel Numbers (APNs) 4458-028-020 and -006 (94,210 square feet of land).

- The WTF area is currently occupied by an existing wastewater treatment plant for the Malibu Colony Plaza shopping center. The treatment includes a physical process (to separate solids from liquids), a biological process (aeration and recirculation), and a chemical process (addition of chemicals [sodium hypochlorite and sodium bisulfate] for treatment) prior to testing of effluent and discharge to seepage pits. These processes include use of several large clarifiers, four above ground storage tanks (ASTs) for wastewater circulation, two ASTs for chemical storage (sodium hypochlorite and sodium bisulfate), an approximately 50,000 gallon underground storage tank that holds the treated effluent prior to discharge, and an injection field comprised of approximately 12 injection zones, each consisting of up to 8 injection wells/seepage pits (only five of which are currently being used). Five groundwater monitoring wells are located around the perimeter of the WTF Property and are monitored quarterly to comply with the current Waste Discharge Permit (WDR) permit.

The WTF area appeared to be vacant or agricultural land as early as 1928. Although it is not possible to determine when this area began to be used for wastewater treatment, aerial photos depict the land as a vacant area with a dirt road as early as 1947, suggesting it could have been used as such at that time. Permits first indicate the presence of septic tanks and seepage pits (leach field) by 1988.

- IW1 is located in Malibu Road, just south of the Malibu Colony Plaza shopping center. IW1 spans a distance of approximately 1,400 feet along Malibu Road west of its intersection with Webb Way. IW1 is bounded to the south by numerous residences, a fire station (a 1,000-gallon diesel AST was observed at the southwest corner of the fire department site), and a commercial strip center at the eastern end. Drycleaner facilities, which are often associated with releases of solvents that affect soil and groundwater over large distances, were observed adjacent to the southeast of the eastern boundary of IW1 (Spic & Span cleaners) and to the north of IW1 (Ogden Cleaners). Five groundwater monitoring wells were observed on the southern boundary of the Malibu Colony Plaza shopping center near the Ogden Cleaners facility and in Malibu Road within the IW1 area. Data from those wells were not available to SCS for review.

The area encompassed by IW1 in Malibu Road was formerly a portion of Pacific Coast Highway (previously known as Roosevelt Highway). A gas station was present at 23757 Malibu Road from at least 1938 to 1957, north of IW1 (and the proposed pipeline running through Malibu Road). The current shopping center to the north of IW1 was constructed between 1987 and 1989. Ogden Cleaners has been a tenant in this Center from at least 1990 to the present.

The southwest corner of IW2 is occupied by a medical building (23661 Pacific Coast Highway) that includes an urgent care facility and a pharmacy. The remaining portion of IW2 is occupied by Legacy Park, which has a walking path and serves as part of a stormwater treatment system which eventually discharges to Malibu Creek. Three monitoring wells and a clarifier (anticipated to be associated with septic system) were observed on the north side of the parking area associated with the building.

IW2 appeared to be vacant until the current structure at 23661 Pacific Coast Highway was constructed around 1975 for use as a bank. Additional gas stations were present in the

area of IW2 at 23641 Pacific Coast Highway (east of IW2) from at least 1966 to 1985, at 23614 Pacific Coast Highway (southeast of IW2) from at least 1956 to 2010, and at 23670 Pacific Coast Highway (south of IW2) from 1975 to the present. Legacy Park was constructed in 2010.

- The proposed pump station areas P1, P3, P5, and P6 are expected to be located within the roadways or near shoulders associated with the roads. PS2 will be located at the northwest corner of the parking lot associated with the Malibu Bluffs Park and PS4 will be located in or on the edge of Legacy Park. The areas of PS3 and PS5 could not be observed visually due to the inaccessibility of the gated Malibu Colony community.

With the exception of PS2, the pump station areas are within existing roadways that have been present since at least 1928. PS2 was in an undeveloped or agricultural area until Pacific Coast Highway was rerouted to the north of it in 1947. By 1960, grading in the area of PS2 was observed for construction of the park road nearby. By 1989, additional grading was observed resulting in its current configuration. The areas surrounding PS1, PS3, and PS5 have been residential since first development in those areas as early as 1928.

- Pipeline areas were observed by driving the roadways where they are proposed. Other than various utilities in the roads and adjacent to them, five groundwater wells in Malibu Road were the only observation to note as part of the pipeline alignment inspection.

Malibu Road appears to have been the former alignment for a portion of Pacific Coast Highway (previously known as Roosevelt Highway) until Pacific Coast Highway was rerouted to the north in approximately 1947. A gas station was present at 23757 Malibu Road from at least 1938 to 1957, just north of the pipeline alignment running through Malibu Road and IW1. The current shopping center to the north of IW1 was constructed between 1987 and 1989, and Ogden Cleaners has been a tenant from at least 1990 to the present. Gas stations were also present at 23670 Pacific Coast Highway (east of the Webb Way pipeline) from at least 1975 to present and at 23387 Pacific Coast Highway (at the intersection with Cross Creek Road) from at least 1968 to present. Additional drycleaner facilities were observed or identified at 23410 Civic Center Way (Landmark Cleaners adjacent to Civic Center and Cross Creek pipelines) from at least 1985 to 1999 and Spic & Span Cleaners currently located at 23680 Malibu Road (southeast of Malibu Road and Webb way pipeline intersection) and was formerly located at 22941 Pacific Coast Highway (north of the pipeline alignment) from at least 1975 through 2010.

- Available records from Los Angeles Department of Public Works (LADPW) indicated that a 550-gallon diesel underground storage tank (UST) had been located on the eastern side of 23720 W. Malibu Road (LA County fire station #88 located south of IW1 and the pipeline in Malibu Road) from 1954 to 1996. Sampling during UST removal showed the presence of low levels (maximum of 33 milligrams per kilogram) of oil range hydrocarbons. This UST is considered a historical recognized environmental condition and the former UST and the current AST at this location are not anticipated to impact the Property.

- Numerous sites/facilities have been identified on the database report associated with waste discharge requirements associated with septic systems. Many of the sites have received Notices of Violations for late reports, missing data, effluent violations, unauthorized flow increases, etc. We do not anticipate that these notices of violation would affect the Property.
- The database report identified numerous known or suspected release cases. These facilities and others identified during historical research and the site inspection (many of which were discussed previously) are recognized environmental conditions based on their proximity to the proposed project and are as follows:
 - HRL Laboratories, 3011 S. Malibu Canyon Rd.
 - GTE (Verizon) Malibu Plant Yard, 3705 Cross Creek Rd.
 - Cross Creek Yard/Adamson Companies Maintenance/1X Mallen Excavating, 3728 Cross Creek Rd.
 - LA Co DPW Road 336/#436TS, 3637 S Winter Canyon Rd.
 - Santa Monica Malibu USD-Webster Elementary, 3602 Winter Canyon Rd.
 - Malibu Shell/Texaco, 23387 Pacific Coast Highway
 - Malibu Sheriff's Station/LA Co DPW, 23555 Civic Center Way
 - Chevron, 23614 Pacific Coast Highway
 - Unocal #6267, 23670 Pacific Coast Highway
 - Chevron Station 97213, 23641 Pacific Coast Highway
 - Spic & Span, 22941 Pacific Coast Highway
 - Spic & Span, 23680 Malibu Rd.
 - Landmark Cleaners, 23410 Civic Center Way
 - Colony Cleaners, 3872 Cross Creek Rd.
 - Ogden Cleaners, 23823 Malibu Rd.
 - Historical gas station, 23757 Malibu Rd.

In summary, SCS has performed a Phase I Environmental Site Assessment of Malibu Civic Center Wastewater Treatment Project located in Malibu, California, in conformance with the scope of 40 CFR 312, in general conformance with ASTM E1527-05, and within the limitations identified within this report. In the opinion of the Environmental Professional, this assessment has revealed evidence of conditions indicative of releases or threatened releases of hazardous substances, as discussed above.

Based on SCS's understanding of the User's intent to install a centralized wastewater collection and treatment facility to include a wastewater treatment plant, injection well areas, pump stations, and pipelines, the facilities known to have releases or have the potential to have releases are identified as recognized environmental conditions (i.e. leaking USTs, solvent use, drycleaners). It is our opinion that hazardous materials could be encountered during project implementation at certain areas on the Property, particularly at or near the facilities identified on Figure 5 in **Appendix A**.

EDR Historical Topographic Map Report

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Pacific Coast Hwy 1996

Table with two columns: Pacific Coast Hwy W (addresses 19020-20518) and Pacific Coast Hwy E (addresses 20520-21217). Includes names and phone numbers.

Pacific Coast Hwy 1996

Table listing Pacific Coast Hwy addresses and associated businesses. Columns include address, business name, phone number, and other details. The table is organized into multiple columns for readability.

Pacific Coast Hwy 1996

Table with columns for address ranges (e.g., 8000S CONT., 9000S CONT.), business names, and phone numbers. The table is organized into two main columns of data.

Pacific Coast Hwy 1985

Table with multiple columns listing addresses, names, and phone numbers for Pacific Coast Hwy in 1985. The table is organized into several vertical sections, each with a header like 'PACIFIC COAST HWY W' or 'PACIFIC COAST HWY E'. Each entry typically includes a street address, a name, and a phone number.

Pacific Coast Hwy 1985

Table with multiple columns listing addresses, names, and phone numbers. Columns include address ranges (e.g., 23901 XXXX), names (e.g., AMER INTL TRAVEL), and phone numbers (e.g., 456-1742). The table is organized into vertical columns and contains a wide variety of business and residential listings.

OWNER-BUILDER DECLARATION

I hereby affirm under penalty that I am exempt from the Contractor's License Law for the following reason (Section 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).
 I, as owner of the property, or my employees with wages as their sole compensation will do the work, and the structure is not intended or offered for sale (Section 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).
 I, as owner of the property, am exclusively contracting with a licensed contractor to construct the project (Section 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a licensed contractor(s) pursuant to the Contractor's License Law.

I am exempt under Section _____ B.&P.C. for this reason _____

LICENSED CONTRACTOR DECLARATION

I hereby affirm under penalty of perjury that I am licensed under provision of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

[Signature] 6/11/10
Signature of Applicant or Agent Date

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:
 I have and will maintain a certificate of consent of self-insure for workers' compensation as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.
 I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier State Compensation Ins Fund
Policy No. 3014543 Exp. 7-1-10

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provision of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

[Signature] 6-10-10
Signature of Applicant or Agent Date

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UN-LAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS (\$100,000), IN ADDITION TO THE COST OF COMPENSATION DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of the City to enter upon the above mentioned property for inspection purposes.

CLAIM NO. 7001 0360 0000 3649 6041

Dear Mr. Izadi:

GENERAL WASTE DISCHARGE REQUIREMENTS FOR WASTE DISCHARGES TO LAND BY SMALL DOMESTIC WASTEWATER SYSTEMS - FIRE STATION NO. 88 AT 23720 WEST MALIBU ROAD, MALIBU, CALIFORNIA, (FILE NO. 02-171)

We have completed our review of your application for Waste Discharge Requirements (WDR) for domestic wastewater generated from Fire Station No. 88 located at 23720 West Malibu Road (see attached map) to an on-site septic disposal system. The fire station occupies a one-story building that regularly houses three to five firefighters. The station is equipped with a kitchen, sleeping quarters, and bathroom facilities including showers.

The discharge volume is estimated at 350 gallons per day and is composed primarily of typical residential wastes. The groundwater elevation at the fire station and in the surrounding vicinity is estimated to be between 8 and 10 feet from the ground surface. The bottom of the seepage pit is located approximately 7.0 feet below ground surface, therefore, the groundwater level is estimated to be located 1 to 3 feet from the discharge point. The Los Angeles County Department of Public Works is preparing a mitigation plan to relocate or upgrade the existing septic system as well as installing groundwater monitoring wells.

Regional Board staff have reviewed the information provided and have determined that the proposed discharge meets the conditions specified in the State Water Resources Control Board (State Board) Water Quality Order No. 97-10-DWQ, "General Waste Discharge Requirements for Discharges to Land by Small Domestic Wastewater Treatment Systems," adopted by the State Board on November 18, 1997.

Enclosed are your Waste Discharge Requirements, consisting of Order No. 97-10-DWQ, Monitoring and Reporting Program No. 97-10-DWQ (Attachment A), Monitoring and Reporting Program No. CI-8621 and Standard Provisions and Reporting for Waste Discharge Requirements (Attachment B). Please note that your discharge must meet the groundwater quality objectives set in the Regional Board's *Water Quality Control Plan for Coastal Watersheds of Los Angeles and Ventura Counties* (Basin Plan) which was adopted on June 13, 1994 and amended on January 27, 1997. The Basin Plan incorporates applicable State and Regional Board plans and policies and other pertinent water quality policies and regulations.

In addition, the State Board adopted a revised *Water Quality Control Plan for the Ocean Waters of California* (Ocean Plan). The State of California Office of Administrative Law and the United

California Environmental Protection Agency

Recycled Paper

Our mission is to preserve and enhance the quality of California's water resources for the benefit of present and future generations.

C400614

States Environmental Protection Agency (USEPA) approved the revised plan on July 9, 2001 and December 3, 2001, respectively. The revised plan contains water quality objectives for coastal waters of California. Monitoring and Reporting Program CI No. 8621 includes receiving water limitations that implement the Ocean Plan.

Although your discharge is enrolled under the General Permit (Order No. 97-10-DWQ), it will be reviewed periodically. Based on the technical information pertaining to your septic disposal system and/or groundwater, the Regional Board Executive Officer (Executive Officer) may determine that the discharge would be better regulated under another general WDR or a specific WDR. Once the decision is made, you will be notified within 30 days before any Board action. If the discharge is regulated under another general WDR, or a specific WDR, which requires board action, the applicability of permit Order No. 97-10-DWQ is immediately terminated on the effective date of the issuance of a new WDR.

You are required to provide the mitigation plan to either relocate the leachfield area or to modify the existing septic system by December 1, 2003. At this time you are not required to conduct a groundwater-monitoring program. However, please note in the near future, you may be required to develop a groundwater-monitoring program which may include the installation of a minimum of two wells in order to detect and evaluate the impacts the may have resulted from the discharge.

The Regional Board is increasingly concerned about the aggregate effects of discharges from individual and community subsurface disposal systems on the Malibu watershed and groundwaters. At this time, these WDRs are being issued to regulate an individual disposal system. Future requirements, however, may require the discharge to be connected to a community collection system, or future requirements may require consistency with the WDRs established for a community collection system.

The Monitoring and Reporting Program requires you to implement the monitoring program on the effective date of coverage under this permit. All monitoring reports should be sent to the Regional Board, ATTN: Information Technology Unit. When submitting monitoring or technical reports to the Regional Board per these requirements, please include a reference to CI No. 8621, which will assure that the reports are directed to the appropriate file and staff. Do not combine other reports with your monitoring reports. Submit each type of report as a separate document.

We are sending a copy of Order No. 97-10-DWQ to the applicant only. A copy of the Order will be furnished to anyone who requests it.

FEDERAL RECORDS

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 04/26/2013 has revealed that there is 1 CERC-NFRAP site within the searched area.

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 07/11/2013 has revealed that there is 1 RCRA-TSDF site within the searched area.

HUGHES RESEARCH LABORATORIES	3011 MALIBU CANYON ROAD	4	31

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 07/11/2013 has revealed that there are 2

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 07/11/2013 has revealed that there are 11 RCRA-SQG sites within the searched area.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 07/11/2013 has revealed that there are 2 RCRA NonGen / NLR sites within the searched area.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency

A review of the HAZNET list, as provided by EDR, and dated 12/31/2012 has revealed that there are 51 HAZNET sites within the searched area.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 09/05/2013 has revealed that there is 1 ENVIROSTOR site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>

EXECUTIVE SUMMARY

EDR PROPRIETARY RECORDS

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 7 EDR US Hist Auto Stat sites within the searched area.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 4 EDR US Hist Cleaners sites within the searched area.

 Primary Waste: Domestic Sewage
 Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
 Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

**4 HRL LABS LLC - MALIBU FACILITY
 3011 MALIBU CANYON RD
 MALIBU, CA 90265**

**WDS S103650974
 LA Co. Site Mitigation N/A**

CA WDS:

Facility ID: Los Angeles River 192053005
 Facility Type: Municipal/Domestic - Facility that treats sewage or a mixture of predominantly sewage and other waste from districts, municipalities, communities, hospitals, schools, and publicly or privately owned systems (excluding individual subsurface leaching systems disposing of less than 1,000 gallons per day).
 Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
 NPDES Number: Not reported
 Subregion: 4
 Facility Telephone: 3103175188
 Facility Contact: Brent A. Thorell
 Agency Name: HRL LABORATORIES LLC
 Agency Address: Not reported
 Agency City,St,Zip: 0
 Agency Contact: Not reported
 Agency Telephone: Not reported
 Agency Type: Private
 SIC Code: 3769
 SIC Code 2: Not reported
 Primary Waste: Domestic Sewage combined with Industrial Waste
 Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
 Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Hazardous Waste Summary:

Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
 Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
 Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

15 ROAD MAINTENANCE YARD 336
 3637 WINTER CANYON RD
 MALIBU, CA 90265

WDS S105774903
 N/A

CA WDS:

Facility ID: Los Angeles River 197000021
 Facility Type: Municipal/Domestic - Facility that treats sewage or a mixture of predominantly sewage and other waste from districts, municipalities, communities, hospitals, schools, and publicly or privately owned systems (excluding individual subsurface leaching systems disposing of less than 1,000 gallons per day).
 Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
 NPDES Number: Not reported
 Subregion: 4
 Facility Telephone: 6264586111
 Facility Contact: Michele Chimienti
 Agency Name: LA CO DEPT OF PUBLIC WORKS
 Agency Address: Not reported
 Agency City,St,Zip: 0
 Agency Contact: Not reported
 Agency Telephone: Not reported
 Agency Type: County
 SIC Code: 0
 SIC Code 2: Not reported
 Primary Waste: Domestic Sewage
 Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
 Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Agency Type: State
 SIC Code: 7999
 SIC Code 2: Not reported
 Primary Waste: Domestic Sewage
 Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
 Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

 23033 PACIFIC COAST HWY ENF N/A
 MALIBU, CA 90265

CA WDS:

Facility ID: Los Angeles River 197400019
 Facility Type: Municipal/Domestic - Facility that treats sewage or a mixture of predominantly sewage and other waste from districts, municipalities, communities, hospitals, schools, and publicly or privately owned systems (excluding individual subsurface leaching systems disposing of less than 1,000 gallons per day).
 Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
 NPDES Number: Not reported
 Subregion: 4
 Facility Telephone: 3104567031
 Facility Contact: Dave Whitehead
 Agency Name: DAVE WHITEHEAD
 Agency Address: 23033 Pacific Coast Hwy.
 Agency City,St,Zip: malibu 90265
 Agency Contact: Dave Whitehead
 Agency Telephone: 3104567031
 Agency Type: Private
 SIC Code: 0
 SIC Code 2: Not reported
 Primary Waste: Domestic Sewage
 Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
 Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

MALIBU SHELL (Continued)

S105774623

Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Hazardous Waste Summary:

Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
 Waste name: BENZENE

Violation Status: No violations found

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**MALIBU COUNTRY MART III
 3900 CROSS CREEK RD
 MALIBU, CA 0**

**WDS S105774620
 ENF N/A**

CA WDS:

Facility ID: Los Angeles River 191347001
 Facility Type: Municipal/Domestic - Facility that treats sewage or a mixture of predominantly sewage and other waste from districts, municipalities, communities, hospitals, schools, and publicly or privately owned systems (excluding individual subsurface leaching systems disposing of less than 1,000 gallons per day).

 Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.

 NPDES Number: Not reported
 Subregion: 4
 Facility Telephone: 3108265635
 Facility Contact: Gregory Kozak
 Agency Name: MALIBU COUNTRY MART LIMITED
 Agency Address: Not reported
 Agency City,St,Zip: 0
 Agency Contact: Not reported
 Agency Telephone: Not reported
 Agency Type: Private
 SIC Code: 5999
 SIC Code 2: Not reported
 Primary Waste: Domestic Sewage
 Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.

 Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

 Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Agency Contact: Cindy McAfee
 Agency Telephone: Not reported
 Agency Type: Private
 SIC Code: 0
 SIC Code 2: Not reported
 Primary Waste: Domestic Sewage
 Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
 Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Aesthetic impairment would include nuisance from a waste treatment facility.
 Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 SIC Code 2: Not reported
 Primary Waste: Domestic Sewage
 Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
 Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category A - Any major NPDES facility, any non-NPDES facility (particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class I disposal site. Includes any small-volume complex facility (particularly those with toxicwastes) with numerous discharge points, leak detection systems or ground water monitoring wells.

SIC Code: 5999
 SIC Code 2: Not reported
 Primary Waste: Domestic Sewage
 Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
 Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.

Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.

Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

 Used oil fuel marketer to burner: No
 Used oil Specification marketer: No
 Used oil transfer facility: No
 Used oil transporter: No

Hazardous Waste Summary:

Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
 Waste name: BENZENE

Violation Status: No violations found

FINDS:

Registry ID: 110013290642

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CA WDS:

Facility ID: Los Angeles River 191341002
 Facility Type: Municipal/Domestic - Facility that treats sewage or a mixture of predominantly sewage and other waste from districts, municipalities, communities, hospitals, schools, and publicly or privately owned systems (excluding individual subsurface leaching systems disposing of less than 1,000 gallons per day).
 Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
 NPDES Number: Not reported
 Subregion: 4
 Facility Telephone: Not reported
 Facility Contact: Kart Kramer
 Agency Name: MALIBU BAY CO.
 Agency Address: Not reported
 Agency City,St,Zip: 0
 Agency Contact: Not reported
 Agency Telephone: Not reported
 Agency Type: Private
 SIC Code: 5541
 SIC Code 2: Not reported
 Primary Waste: Domestic Sewage
 Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
 Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Hazardous Waste Summary:

Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
 Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D009
 Waste name: MERCURY

Waste code: P001
 Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste code: P042
 Waste name: 1,2-BENZENEDIOL, 4-[1-HYDROXY-2-(METHYLAMINO)ETHYL]-, (R)-

Waste code: P075
 Waste name: NICOTINE, & SALTS

Waste code: P081
 Waste name: NITROGLYCERINE (R)

Violation Status: No violations found

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Agency Contact: Not reported
 Agency Telephone: Not reported
 Agency Type: Private
 SIC Code: 0
 SIC Code 2: Not reported
 Primary Waste: Domestic Sewage
 Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
 Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

 Primary Waste: Domestic Sewage
 Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
 Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/09/2013	Telephone: N/A
Date Made Active in Reports: 07/10/2013	Last EDR Contact: 10/11/2013
Number of Days to Update: 62	Next Scheduled EDR Contact: 01/20/2014
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/09/2013	Telephone: N/A

Number of Days to Update: 62	Next Scheduled EDR Contact: 01/20/2014
	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/29/2013	Telephone: 703-412-9810
Date Made Active in Reports: 08/09/2013	Last EDR Contact: 10/18/2013
Number of Days to Update: 72	Next Scheduled EDR Contact: 12/09/2013
	Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/29/2013	Telephone: 703-412-9810

Number of Days to Update: 72	Next Scheduled EDR Contact: 12/09/2013
	Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

DOT OPS: Incident and Accident Data

Department of Transportation, Office of Pipeline Safety Incident and Accident data.

Date of Government Version: 07/31/2012	Source: Department of Transportation, Office of Pipeline Safety
Date Data Arrived at EDR: 08/07/2012	Telephone: 202-366-4595
Date Made Active in Reports: 09/18/2012	Last EDR Contact: 11/06/2013
Number of Days to Update: 42	Next Scheduled EDR Contact: 02/17/2014
	Data Release Frequency: Varies

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/24/2013

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Number of Days to Update: 18	Next Scheduled EDR Contact: 01/08/2014
	Data Release Frequency: No Update Planned

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 09/11/2013	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 09/11/2013	Telephone: 916-323-3400

Number of Days to Update: 35	Next Scheduled EDR Contact: 02/17/2014
	Data Release Frequency: Quarterly

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

Date of Government Version: 12/31/2012	Source: California Environmental Protection Agency

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

EDR PROPRIETARY RECORDS

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR US Hist Cleaners: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

SAN DIEGO COUNTY:

Hazardous Materials Management Division Database

The database includes: HE58 - This report contains the business name, site address, business phone number, establishment 'H' permit number, type of permit, and the business status. HE17 - In addition to providing the same information provided in the HE58 listing, HE17 provides inspection dates, violations received by the establishment, hazardous waste generated, the quantity, method of storage, treatment/disposal of waste and the hauler, and information on underground storage tanks. Unauthorized Release List - Includes a summary of environmental contamination cases in San Diego County (underground tank cases, non-tank cases, groundwater contamination, and soil contamination are included.)

Date of Government Version: 09/23/2013

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Leadership Skills to Enhance Client Service

Professional Affiliations

Professional Environmental Marketing Association (PEMA), Member (2011 to Present)
National Ground Water Association (NGWA), Member (2012)

Professional Experience

Ms. Hutchens has 11 years of experience in environmental consulting, all with SCS. She has a diverse background in environmental sciences, and technical skills related to collection of soil samples, determination of soil classifications and properties, slope stability assessments, interpretation of depositional environments, and stratigraphic analysis. Since joining SCS, she has been involved in numerous projects related to the investigation and remediation of hazardous chemicals in soils and groundwater. Her work experience includes all project phases from development of cost estimates for various site assessment and cleanup programs, to groundwater monitoring and sampling, to preparation of final reports and interfacing with regulatory agencies.

Selected project activities include:

- Involvement with numerous Phase I Environmental Assessments completed in accordance with various lender, ASTM, or government guidelines. Activities have consisted of evaluating current and past on-site operations, generating historical property use information, identifying potentially contaminated sites in the surrounding areas, reviewing previous reports and/or files maintained by regulatory agencies, and providing conclusions and recommendations regarding the presence of Recognized Environmental Conditions and further investigation.
- Involvement with numerous investigations of known or suspected hazardous waste sites to identify and characterize chemicals of concern in soil, soil vapor, and groundwater in accordance with regulatory requirements. Contaminants include a variety of hydrocarbon products, solvents, heavy metals, polychlorinated biphenyls, and pesticides. Activities have included preparation of work plans, conducting soil gas surveys, installation of soil borings and subsequent sampling, and evaluation of applicable remedial alternatives.

- Groundwater well installation and monitoring. Projects have involved precision mapping of sites, collection of soil and groundwater samples, evaluation of subsurface contaminants in groundwater in accordance with regulatory requirements or generally accepted guidelines, and evaluation of groundwater remediation alternatives.
- Involvement with numerous soil gas surveys to assess the presence, nature, and extent of volatile organic compounds (VOCs) and/or methane related to contaminated soils, groundwater, and/or landfills. Elements of these projects have included assessments of vapor intrusion, protection of structures from subsurface gases, monitoring of indoor air, and health risk assessments.
- Numerous projects related to the removal, investigation, and remediation of contamination from leaking underground storage tanks (USTs). In accordance with requirements of the various regulatory agencies throughout Southern California, these UST projects have included soil, soil gas, and groundwater contamination, and such tasks as evaluation of site and regional hydrogeologic conditions; development of work plans and health and safety plans; coordination and completion of tank removals; design of investigative programs; review and selection of potential remedial alternatives; and preparation of summary reports of findings.
- Oversight of projects involving installation of landfill gas mitigation systems and monitoring wells, including lithologic logging and design quality assurance (QA) at numerous landfills across Southern California.
- Characterization of hazardous waste materials, including collection of soil and/or liquid samples to profile waste materials, interpretation of laboratory results, and evaluation of disposal/recycling options to minimize costs and liabilities to clients associated with the removal of wastes.
- Planning, coordination, and supervision of remedial actions that included excavation, transport, and disposal of contaminated soils. Work involved preparation of Remedial Action Plans, direction of confirmatory sampling, and interfacing with regulatory agencies.

Environmental Management

Recent projects in which Ms. Hutchens has participated include:

Project Manager for assessment and remediation of former dry cleaning facilities.

Investigations have been completed at numerous active and former dry cleaning facilities to assess the potential for releases of solvents. Investigations have consisted of soil vapor assessments, collection of bulk soil samples, and groundwater monitoring. Additional evaluations have been completed to define the extent of the plume and obtain information to evaluate remedial alternatives. Implemented remedial measures have included excavation, vapor extraction, monitored natural attenuation, and risk management.

Project Manager for investigation and remediation of industrial facility redeveloped to commercial warehouse/office, Commerce, CA. SCS conducted a series of environmental assessments, investigations, and remedial activities that provided sufficient information to identify the environmental issues, business risks, and facilitate the client's successful purchase of property. A number of recognized environmental conditions, including former and an existing unpermitted underground fuel storage tanks, were identified. Project activities conducted concurrently with the redevelopment of the property included shallow and deep soil and soil vapor investigations; installation of groundwater monitoring wells and subsequent groundwater sampling; permitting and removal of existing UST, subsequent remedial excavation under Los Angeles County Fire Department (LACFD) oversight to obtain closure; shallow excavation of former UST area; and installation of soil vapor extraction and monitoring wells and soil vapor extraction under RWQCB oversight.

Project Manager for site investigation and remedial activities, Retirement Housing Foundation, Los Angeles, CA. As follow-up to a Phase I Environmental Assessment completed on this property, soil and soil vapor investigations were completed to assess the potential for releases of heavy metals and VOCs based on historical operations at the property. Investigation activities indicated elevated tetrachloroethylene (PCE) and lead in the subsurface exceeding regulatory guidelines. Remediation of the lead-impacted soils was conducted under LACFD oversight. An evaluation of the health risk from PCE in the subsurface was conducted and submitted to the LACFD. Site closure with respect to PCE and lead in the subsurface was approved by LACFD facilitating the client's submittal for funding of the construction of the retirement housing development.

Ms. Hutchens has participated in a certified health and safety program in compliance with OSHA Standard 29 CFR 1910.120. She is knowledgeable in incident response operations, team functions, personnel safety, and field equipment. She is able to recognize and evaluate potential chemical and physical hazards and associated risks in field operations; discuss and use personnel protective equipment such as respiratory protection and protective clothing; use and interpret direct-reading instruments; and examine and establish Standard Operating Safety Guidelines to ensure safe and effective response operations.

JULIO A. NUNO

Education

BS – Biological Sciences, University of Southern California, 1979
MS – Environmental Engineering, University of Southern California, 1982

Professional Experience

For almost 30 years, Mr. Nuno has participated in or directed projects related to hazardous waste/materials management, due diligence, site assessment, and remediation. He has considerable experience assessing releases from and upgrading underground storage tanks (USTs). He works extensively with regulatory agencies and fully understands regulations pertaining to hazardous waste. His project experience is summarized below.

Hazardous Materials/Wastes Management

Project Manager for closure of an ordnance production and ramjet test facility, Van Nuys, CA.

Project involved closure of the facility that included hazardous waste management (Resource Conservation and Recovery Act [RCRA]) units. Closure activities for the facility included implementing a plan approved by the California Environmental Protection Agency, Department of Toxic Substances Control (DTSC); conducting an inventory and sampling various containers of hazardous materials; preparing a preliminary site assessment; conducting an investigation of former underground tanks and hazardous materials storage areas; providing asbestos management services; installing/monitoring groundwater wells; and remediating impacted areas. Mr. Nuno served as the primary contact with DTSC and the client.

Managed a 2-year multiple assignment contract to provide environmental services to the Port of Los Angeles.

Projects included preliminary site assessments of numerous properties scheduled for acquisition by the Port; implementation of subsurface investigations for two closed shipyards; development of a sampling plan and collection of surface soil samples from property used for the storage of various hazardous materials; collection and analysis of samples from building materials for asbestos; and collection and analysis of samples from creosote wharf pilings to evaluate disposal options. Mr. Nuno's responsibilities included coordination of site activities and interfacing with Port personnel, review of project submittals, preparation of monthly progress reports, management of subcontractors, and interfacing with regulatory agency personnel.

Due diligence assessments of properties prior to acquisition. Mr. Nuno has completed various due diligence assessments of properties prior to acquisition by real estate developers, City Redevelopment Agencies, corporations, non-profit entities, and private parties. These projects

have included Phase I assessments in accordance with federal All Appropriate Investigation (AAI) regulations and ASTM standards; inspections for asbestos and lead-based paint; Phase II investigations; preparation of abatement and remediation cost estimates; and regulatory agency coordination. Mr. Nuno served as the Project Manager for the first closure issued by the Los Angeles Regional Water Quality Control Board (RWQCB) under the Polanco Bill.

Project Director as part of the due diligence associated with acquisition of the Los Angeles Dodgers organization by Fox. Mr. Nuno was responsible for coordinating assessments of Dodger Stadium in Los Angeles and the training facility in Vero Beach, FL. The assessments included a Phase I, lead-based paint surveys, and inspections for asbestos-containing materials. A subsurface investigation of certain areas was also completed.

Regulatory compliance assessment of a manufacturing facility, Bell, CA. Evaluation of facility operations was conducted to determine compliance with environmental regulations, including materials management, permitting, and maintenance of records. A report was prepared that summarized the applicable regulations and provided recommendations.

Managed a multi-year contract for environmental services at the Long Beach Naval Shipyard and Terminal Island Naval Complex. Projects completed under the contract included preparation of a hazardous materials Spill Prevention Control and Countermeasures (SPCC) Plan, evaluation of wastewater discharges from industrial sources, preparation of a closure plan for a permitted hazardous waste storage facility, design of three hazardous waste staging facilities, and implementation of a site closure investigation.

Project to determine whether impoundment ponds used for the treatment of wastewater generated during operations involved in explosives formulation and packing should be permitted as hazardous waste treatment facilities. This project, completed at a military facility, involved interviewing personnel familiar with operations; collecting wastewater and sediment from the impoundments for subsequent analysis per regulatory requirements; and presenting results in a final written report.

Hazardous waste/materials management program for the Nevada Department of Transportation. Visits were made to each field maintenance station and major maintenance station to determine the types of hazardous materials used, and methods of handling and disposal. The final report contained (1) suggestions for improving hazardous waste/materials management practices; (2) a policy document for the hazardous materials; and (3) a training program for personnel involved in hazardous waste management.

Guidance to the California Department of Health Services in performing and implementing an audit program for facilities generating hazardous wastes. The objective of the audits was to evaluate present waste/materials management practices and offer recommendations that would reduce the volume of wastes generated. Recommendations were evaluated on the basis of cost-effectiveness and ease of implementation. Audits programs were developed for three industries: the paint and body segment of the automotive repair industry; the marine shipyard maintenance and repair industry; and the precious metals recovery industry.

Inventory of oil-filled electrical equipment at properties owned by the State of California to determine if this equipment contains PCBs. Project consisted of collecting information and determining potential pathways and receptors in the event that a failure occurred.

Preparation of Spill Prevention, Control, and Countermeasures (SPCC) Plans. Mr. Nuno has directed and managed several projects that involved preparation of SPCC Plans, including several at container facilities within the Port of Long Beach, an airship operation in Carson, a printing operation, and an aerospace facility at the Van Nuys Airport. Plans were prepared in accordance with federal regulations.

Site Assessment and Remediation

For the Staples Center/LA Live in Los Angeles, served as Project Director for assessment and cleanup of properties acquired as part of the support area (parking lots, future hotels, and other support operations). The project included Phase I assessments of properties on several blocks surrounding the center, implementation of subsurface investigations to assess potential contaminants from past on-site operations to soil and groundwater, risk evaluation and negotiation of cleanup levels with regulatory agencies, and implementation and oversight during remediation. Due to the project schedule, work on this project was completed on an expedited basis.

Preparation of a Remedial Action Plan (RAP) and Remedial Design Documents for the Los Angeles Unified School District (LAUSD) South Region Elementary School No. 6. Mr. Nuno served as the principal contact for preparation of an RAP and Remedial Design Documents. The documents were completed to address requirements of DTSC and were approved for implementation. The design included excavation of soils impacted by pesticides, petroleum hydrocarbons, and VOCs, and in situ remediation of VOC-impacted soil using vapor extraction.

Investigations and remediation of former dry cleaning facilities. Investigations have been completed at numerous active and former dry cleaning facilities to assess the potential for releases of solvents. Investigations have consisted of soil vapor assessments, collection of bulk soil samples, and groundwater monitoring. Additional evaluations have been completed to define the extent of the plume and obtain information to evaluate remedial alternatives. Implemented remedial measures have included excavation, vapor extraction, monitored natural attenuation, and risk management.

Remedial investigation, groundwater well installation and monitoring, and evaluation of mitigation measures for a former refinery in central California. Mr. Nuno served as Project Manager for the investigation on the site and was responsible for coordination of site activities, interpretation of analytical data, and interfacing with the client and regulatory agency personnel.

Naval Assessment and Control of Installation Pollutants program conducted at 16 Navy and Marine Corps facilities. As part of the DOD installation restoration program, potentially contaminated sites resulting from the past use, storage, handling, and disposal of hazardous materials were identified at each of the 16 facilities that were assessed under this program. The project consisted of the review of archival and base records, interviews with long-term or retired Base personnel, conducting on-site inspections/surveys, and writing a final written report.

Former Miller Way Landfill closure and removal of soil stockpile from former gun range. On behalf of the City of South Gate, CA, Mr. Nuno has been involved with the closure of a former inert refuse landfill. Assistance was provided for closure of the facility, which included discussion with the Los Angeles RWQCB, preparation of a grading plan for the facility, and providing quality assurance as part of the grading process and installation of drainage structures. Mr. Nuno was also involved in the investigation and remediation of soil from the site that had been impacted as a result of a former gun range that occupied a portion of the landfill. Following an inspection by DTSC, an enforcement order was issued to remove a stockpile of soil containing lead. Under Mr. Nuno's direction, efforts were conducted to characterize and dispose of the soil in a cost-effective manner. Mr. Nuno interfaced with DTSC personnel throughout the program. A report was submitted to DTSC that was the basis for issuance of a no further action letter regarding these soils.

Supplemental site investigation and preparation of a health risk assessment for former industrial zinc plating facility, Long Beach, CA. A removal action had been completed at this facility by the US Environmental Protection Agency (US EPA) after the facility was abandoned. SCS reviewed available reports for the facility, initiated discussions regarding the site with DTSC, prepared a work plan for additional investigation in accordance with the corrective action agreement, and implemented the investigation that included collection and analysis of soil, soil vapor, and groundwater samples. Data collected as part of the site investigation were used to prepare a health risk assessment submitted to DTSC for review and approval, leading to approval to renovate and reuse the building for commercial purposes.

Underground Storage Tanks

University of California, Los Angeles. For several years, Mr. Nuno has assisted UCLA in complying with applicable federal, state, and local regulations for USTs throughout the campus. Services provided include inspections, review of existing as-built drawings, coordination of testing, preparation of plans for upgrades or modifications, assisting with plan checks, interfacing with regulatory agencies, conducting sampling, preparation of work plans and closure reports, and providing construction quality assurance.

City of South Gate Department of Public Works. Following failed SB 989 tests of fueling system and emergency USTs, evaluations of the existing installations were conducted to identify the necessary upgrades. As Project Manager, Mr. Nuno interfaced with the client and regulatory agency personnel for several projects that entailed providing recommendations for upgrading underground tank installations, preparing and reviewing plans and specifications, providing assistance during the bidding process, conducting oversight during installation, collecting soil samples as part of closures, and preparing closure reports.

Retirement Housing Foundation, Angelus Plaza. As follow-up to a Phase I environmental assessment completed on this property, an investigation was completed to assess the potential for releases of fuel from underground tank systems on the property. Borings were drilled adjacent to the underground tanks and pipelines. Subsequent assistance was provided in evaluating alternatives for replacing one of the underground tanks.

Investigation and remediation of soil and groundwater impacted as a result of release from a UST, Santa Fe Springs, CA. This project consisted of characterizing soil and groundwater with the oversight of the Los Angeles County Department of Public Works and RWQCB. A vapor extraction remediation system was installed to mitigate gasoline-impacted soil. Throughout the remediation effort, groundwater was monitored. Costs were reimbursed under the California Underground Tank Cleanup Fund; therefore, all work and associated costs were subject to review by the fund.

Evaluation of alternatives for mitigation of soil contamination from leaking USTs at Los Angeles International Airport. The evaluated alternatives included excavation and on-site treatment, excavation and hauling to a disposal site, vapor extraction, and no action. Alternatives were evaluated in terms of ease of implementation, regulatory constraints, costs, duration of treatment, and other applicable factors.

APPENDIX G
USER QUESTIONNAIRE

Project No.: _____
Project Name: _____

USER QUESTIONNAIRE

Broadly speaking, anyone pursuing the protections afforded under CERCLA by initiating all appropriate inquiries into current and past property use, including potential purchasers of property, potential tenants on a property, owners of property, lenders, and/or property managers, is defined as the “User.” One of the primary reasons a User has a Phase I Environmental Site Assessment (ESA) completed for a real estate transaction is to document due diligence efforts and “all appropriate inquiry,” thereby satisfying certain elements required by CERCLA in order to qualify for a Landowner Liability Protection (LLP).

LLP is the term used to describe the three potential defenses to Superfund (CERCLA) liability in EPA’s Interim Guidance Regarding Criteria that landowners must meet in order to qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability (“Common Elements” Guide) issued on March 6, 2003.

In order to qualify for one of the LLPs offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “Brownfields Amendments”), 40 CFR Part 312 requires that the User must conduct certain inquiries and may provide the following information (if available) to the environmental professional (40 CFR 312.22). Failure to conduct these inquiries could result in data gaps, such that the “all appropriate inquiry” is incomplete.

Those items that are the responsibility of the User include the following:

- Identification of environmental cleanup liens against the subject property, if not otherwise obtained by the environmental professional.
- Specialized knowledge or experience of the User.
- Determination of the relationship of the purchase price to the fair market value of the subject property, if the property were not contaminated.
- Commonly known or reasonably ascertainable information about the subject property, if not otherwise obtained by the environmental professional.

The “Users Questionnaire” addresses these and other issues, some of which are outside the scope of work of the environmental professional completing an ESA for a user. However, completion of this questionnaire is important for you, the User, to qualify for one of the LLPs. For your own legal protection, please complete the appropriate research and keep the completed questionnaire in your files.

The AAI regulations do not require this information to be provided to the environmental professional. If you wish to have this information included in the ESA report, return the questionnaire either by mail, e-mail or fax to the environmental professional prior to completion of the report so your responses can be incorporated into the final ESA report by the environmental professional. Failure to provide this information to the environmental professional will be treated as a data gap in the ESA report.

Site address: _____

Completed by: Name - _____

Title - _____

Date: _____

(1) Environmental Cleanup liens that are filed or recorded against the site (40 CFR 312.25)

Are you aware of environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

No

(2) Activity and land use limitations (AULs) that are in place on the site or that have been filled or recorded in a registry (40 CFR 312.26).

Are you aware of any AUL, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local laws?

The site is currently zoned CV-2 (Commercial Visitor - Serving 2). The City is proposing to create a Civic Center Wastewater Treatment Facility (CCWTF) overlay for the treatment plant that would add centralized wastewater treatment facility as a conditionally permitted use while keeping intact all the uses allowed under the CV-2 zoning.

(3) Specialized knowledge or experience of the person seeking to qualify for LLP (40 CFR 312.28)

As the user of this ESA, do you have any specialized (non-public) knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

The site is currently being used as a wastewater treatment site, processing wastewater for the nearby shopping center (to the south). Based on what we know, the current treatment system uses trickling filters to treat the influent. The resulting effluent is disinfected using hypochlorite, and then dechlorinated using sodium bisulfate before being discharged to seepage pits (for percolation to groundwater).

(4) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29)

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude there are a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

We have no information regarding this the transaction is being handled by the City. I have an information request into them about this.

(5) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30)

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as the user,

- (a) Do you know the past use of the property? Based on what we know, the only historical site use is as a wastewater treatment facility.
- (b) Do you know specific chemicals that are present or once were present at the property?
sodium hypochlorite and sodium bisulfate
- (c) Do you know of spills or other chemical releases that have taken place at the property?
No
- (d) Do you know of any environmental cleanups that have taken place at the property?
No

(6) The degree of obviousness of the presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indications that point to the presence or likely presence of contamination of the property?

Visually, the site appears to be clean.
